Arithmetic Practice Test II (for in class)

Instructions

I) Write a title, name, date, and course.
II) Number each problem, circle the number, rewrite the problem, and show all work.
III) Put a rectangle around your answers.
IV) Write any fractions in your answers in lowest terms and never leave your answers as improper fractions.

① The number at the top of a fraction is called the ____________ and the number at the bottom of a fraction is called the ____________.

② If a number can be factored, it is called ____________ and if a number cannot be factored it is called ____________.

③ Circle the numbers in the list below that are prime.

6, 10, 3, 18, 13, 4, 23, 2, 36

④ Use factor trees to find the prime factorization of the following numbers. Write repeating factors in power notation (e.g. 3^4) and write the factors from least to greatest (e.g. $3 \cdot 5^2 \cdot 7$).

27   616

⑤ What do GCF and LCM stand for?

⑥ Find the GCF of each of the following pairs of numbers.

8 and 20.   63 and 81.

⑦ Find the LCM of each of the following pairs of numbers.

6 and 36.   8 and 20.   7 and 8.

Perform the following operations.

⑧ $\frac{6}{7} + \frac{2}{9} + 3 + 4\frac{5}{9}$

(9) $\frac{5}{8} \div \frac{3}{4}$

(10) $\frac{5}{6} - \frac{1}{4}$

(11) $5\frac{1}{3} \times 4\frac{5}{8}$

(12) What is an improper fraction? What is a mixed number?

(13) Find the product of $3\frac{5}{7}$ and 46.

(14) Find the sum of $\frac{4}{7}$ and $6\frac{3}{35}$

(15) Find the difference between $7\frac{3}{10}$ and $5\frac{4}{5}$.

(16) Divide $4\frac{2}{5}$ by 6.

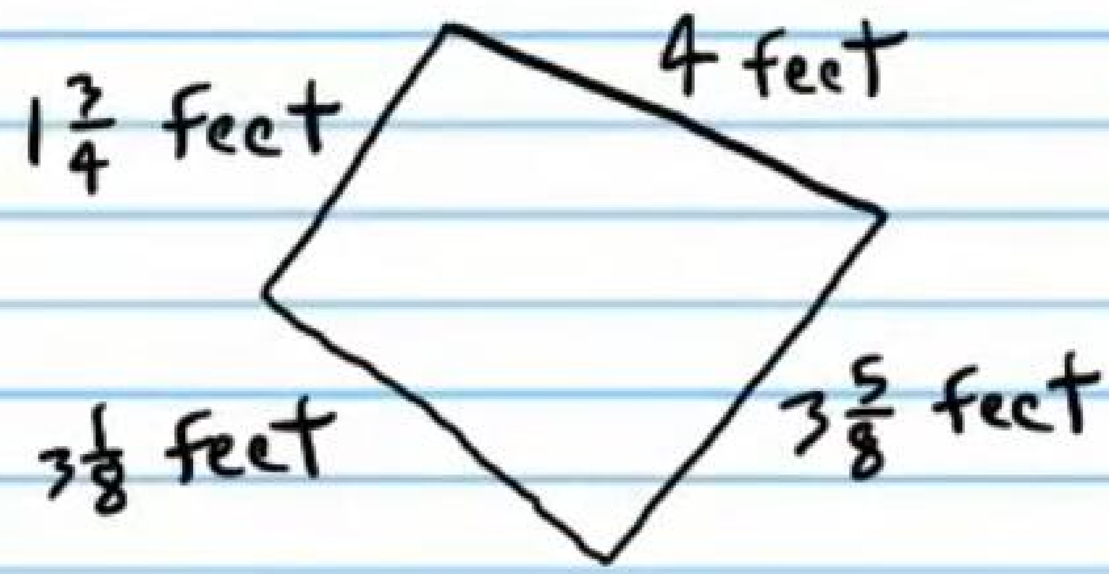
(17) Your friend gives you $3/4$ of his candy bar, but you eat only $2/5$ of what he gave you. What fraction of the whole candy bar did you eat?

(18) After loading a truck with building material, the truck weighed $3\frac{1}{9}$ tons. After the building material was removed, the truck weighed $3\frac{1}{18}$ tons. How much does the building material weigh?

(19) A car travels $2/3$ of a mile per minute. If the car travels at this speed for $1/8$ of a minute, how far did it move?

(20) Bob burns $3\frac{7}{9}$ calories per minute watching T.V. If he watches T.V. for 86 minutes, how many calories did he burn?

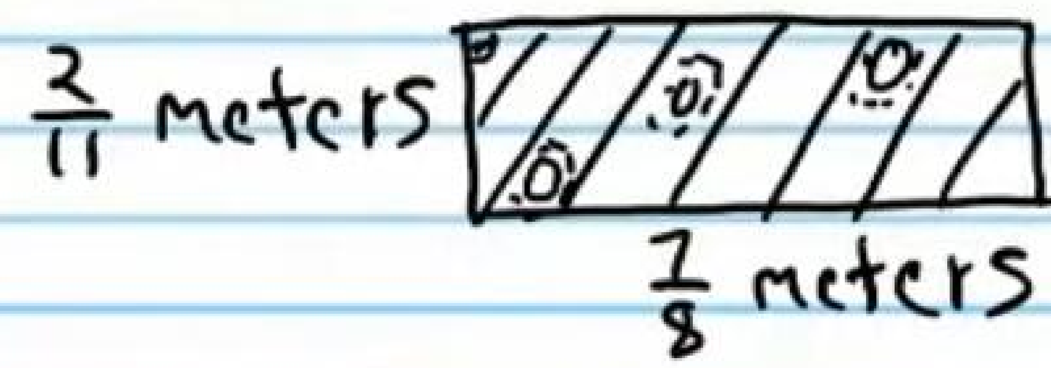
21. Find the perimeter of the shape below.



22. A recipe requires $4\frac{2}{5}$ cups of white sugar and $2/9$ cups of brown sugar. How much more white sugar is needed than brown sugar?

23. There are $2\frac{37}{50}$ centimeters in one inch. If an insect is $1\frac{1}{10}$ centimeters long, how long is it in inches?

24. Find the area of the rectangular carpet below.



25. If you have $\frac{8}{9}$ of a pound of fudge, and you want to divide it evenly among your seven friends, how much fudge will each of your friends get?
