

Arithmetic Test I

Name _____
Date _____
Arithmetic

Instructions

- I) As always, write a title, name, date, and course.
- II) Number each problem, circle the number, and show all work.
- III) Put a rectangle around your answers.
- IV) Time yourself and finish within two hours.
- V) Every problem is worth four points for a total of 100 points. Your score should be 70 points or above.
- VI) Print a copy of this test, three hole punch it, and put it in your binder next to your work.

Perform the following operations.

- ① $7 \div 1$
- ② 73×41
- ③ $7,056 + 38,043$
- ④ $8200 - 390$
- ⑤ $7410 \div 6$
- ⑥ $0 \div 7$
- ⑦ $12 \div 0$
- ⑧ 9×300
- ⑨ Find the perimeter of the shape below.

75 meters
60 meters
21 meters
- ⑩ Find the difference between 718 and 527.

- ⑪ Write the following number in word form.

40,628

- ⑫ If there are 16 ounces in one pound, how many ounces are in 407 pounds?

- ⑬ If you multiply a whole number by ten, the product is the same number but with a _____ written to the right of it.

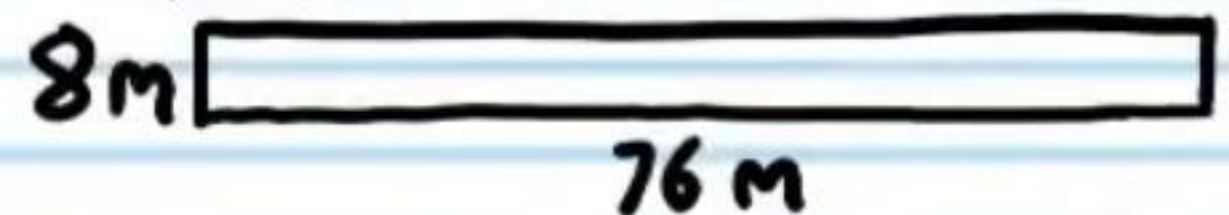

- ⑭ If you add two numbers, the result is called the _____ of the two numbers.

- ⑮ Write the following expression in number form.

Two hundred sixty thousand one hundred seventy-seven.

- ⑯ Abbey paid \$417,000 for her house. But she later discovered that it was only worth \$304,008. How much could she have saved if she had done more research before purchasing?

- ⑰ A parking lot is eight meters by 76 meters (shown below). What is the area of the parking lot?

- ⑱ What is the name of the place of the underlined number below? What is the place value of the number? 728

①⑨ Fill in the bubble with $>$ or $<$.

7,891,593 ☐ 66,953,199

②⑩ A golf course contains 64 acres of land. The owner of the course wants to distribute those acres equally to eight holes. How many acres will each hole get (an acre is a specific amount of land)?
