

Class 19: Operations with Decimals

Find the Sum.

① $23.7 + 368.014$ ② $876.053 + 0.199$

③ $401.91 + 52.37$ ④ $1234.321 + 89.71$

⑤ $536 + 43.5$ ⑥ $0.556 + 82$

⑦ $9 + 4,431.1$ ⑧ Find the sum of 12,338 and 705.36.

⑨ $0.345 + 19 + 827.32$ ⑩ $901 + 3.2 + 1.0008$

Find the Difference

⑪ $723.36 - 15.24$ ⑫ $95.111 - 80$

⑬ $54.267 - 1.018$ ⑭ $3,019.04 - 17$

⑮ $578.202 - 23.918$

⑯ Find the difference between 7,122 and 56.03.

(17) $8,400.071 - 436.225$ (18) What is 329.5 minus 256?

(19) $750 - 4.8103$

(20) $0.5316 - 0.2847$

(21) $76 - 0.55102$

(22) Subtract 29.081 from 872.

(23) $83.071 - 9$

(24) $6 - 0.03074$

Find the Product

(25) 72.4×0.02

(26) 0.4×0.03681

(27) 83.1×0.3

(28) 0.0006×14.7

(29) 9×6.23

(30) Find the product of 0.7 and 81,256.

(31) 3×8.4

(32) 202.2×3

• (33) 8.9×0.501

(34) What is 63.7 times 43?

(35) 0.32×817

(36) 700×1.8

• (37) 0.000045×26.2

(38) What is 523,000 multiplied by 2.4?

• (39) $0.0025 \times 36,200$

(40) 0.00563×0.0023

• (41) 79.3×2.04

(42) 0.423×0.000824

(43) Billy bought a video game for \$54.04 and after buying the game he had \$208.26 leftover in his savings account. How much did he have in his savings account before he bought the game?

④ Alan had \$ 903 in his wallet and he spent \$ 652.50 on a used car. How much does he have in his wallet now?

④ There are 2.54 centimeters in one inch. How many centimeters are in 8.5 inches?

④ If cherries cost \$ 4.81 per pound, how much would it cost to buy 1.42 pounds of cherries?
