

Finding the Coordinates of Points of Concurrency Generated by Triangles (Homework)

Given the graphs of the triangles below, find the coordinates of the circumcenters, orthocenters, and centroids.

①

Circumcenter: $(\frac{13}{3}, \frac{14}{3})$
Orthocenter: $(\frac{4}{3}, \frac{11}{3})$
Centroid: $(\frac{10}{3}, \frac{13}{3})$

②

Circumcenter: $(0, 3)$
Orthocenter: $(-3, 6)$
Centroid: $(-1, 4)$

③

Circumcenter: $(-\frac{2}{2}, 3)$
Orthocenter: $(2, 7)$
Centroid: $(-\frac{7}{3}, \frac{13}{3})$

④

Circumcenter: $(-3, 5)$
Orthocenter: $(10, -6)$
Centroid: $(\frac{4}{3}, \frac{4}{3})$
