

Area (Part II): Segments of Circles (Homework)

Name
Date
Course

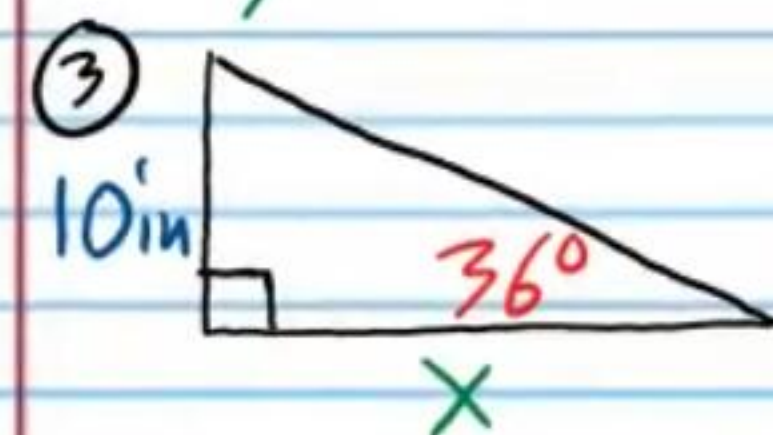

Find the value of each variable below. Round to the nearest hundredth.

4.68 cm

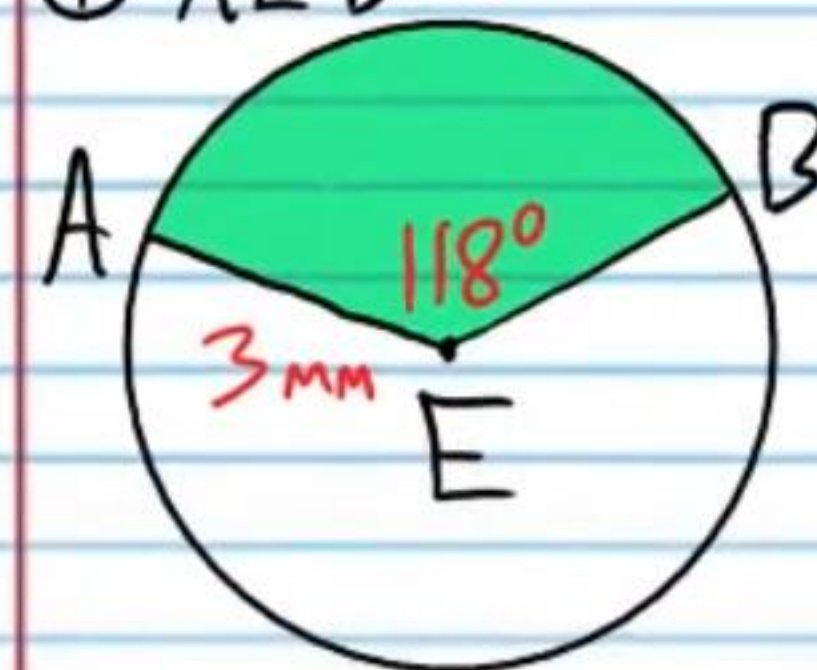

4.59 m

13.76 in

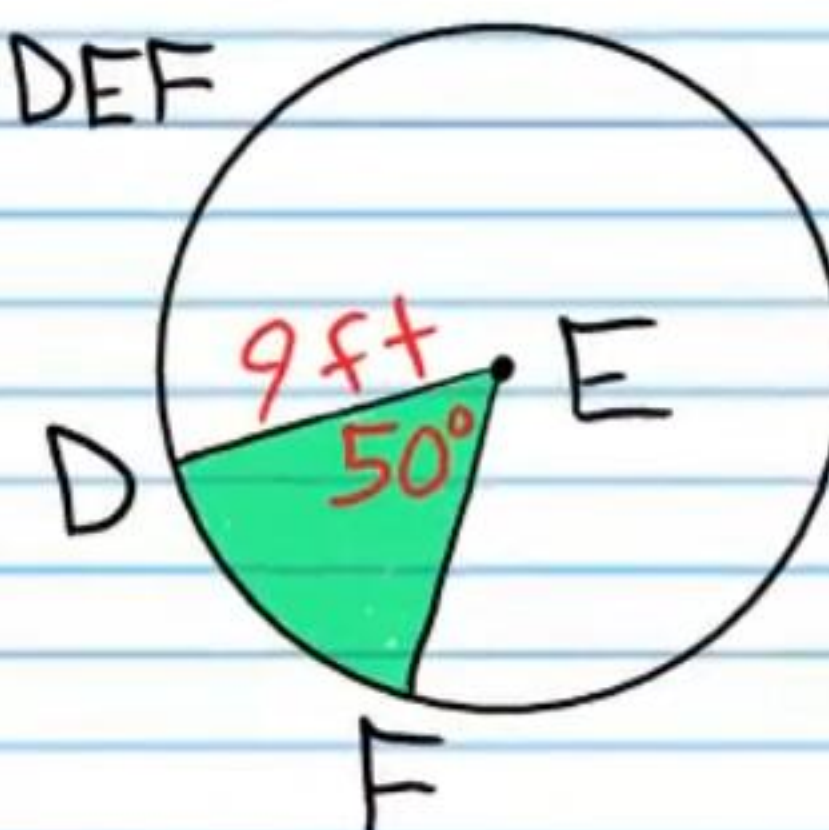

If E is the center of the following circles, find the area of the sectors below. You must use the π button on your calculator. Round to the nearest hundredth.

④ AEB

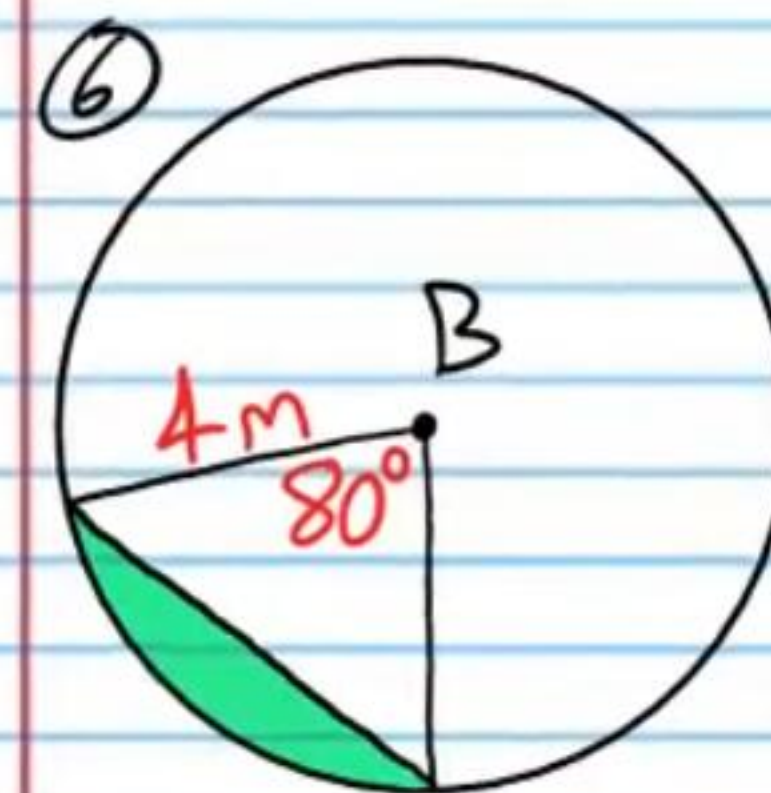

9.27 mm²

⑤ DEF

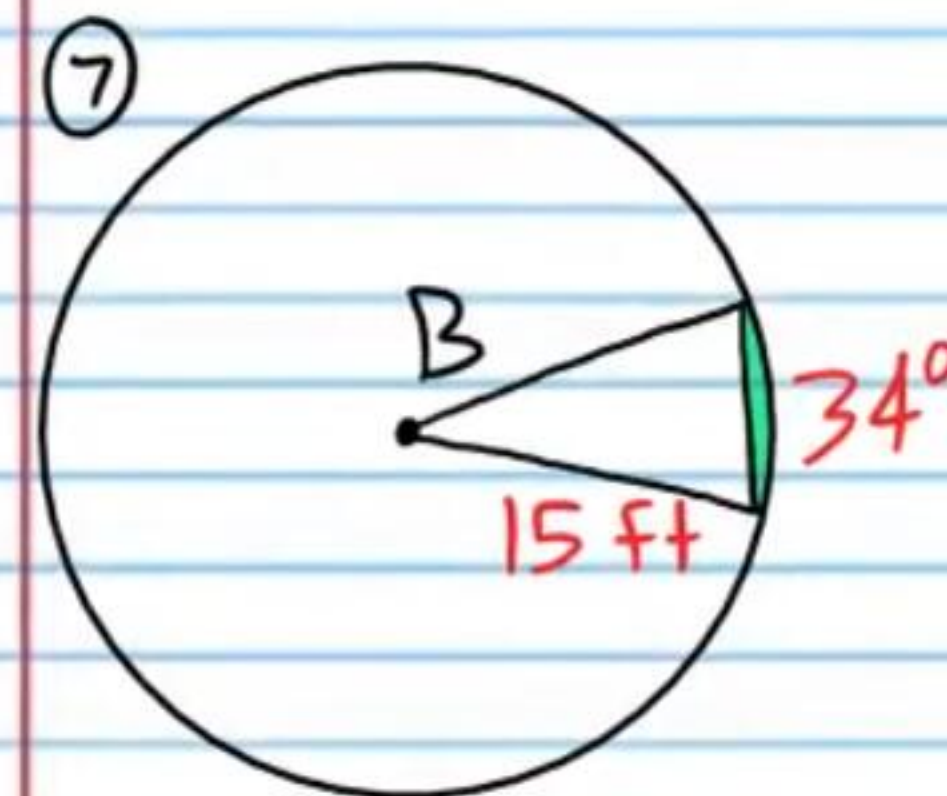

35.34 ft²

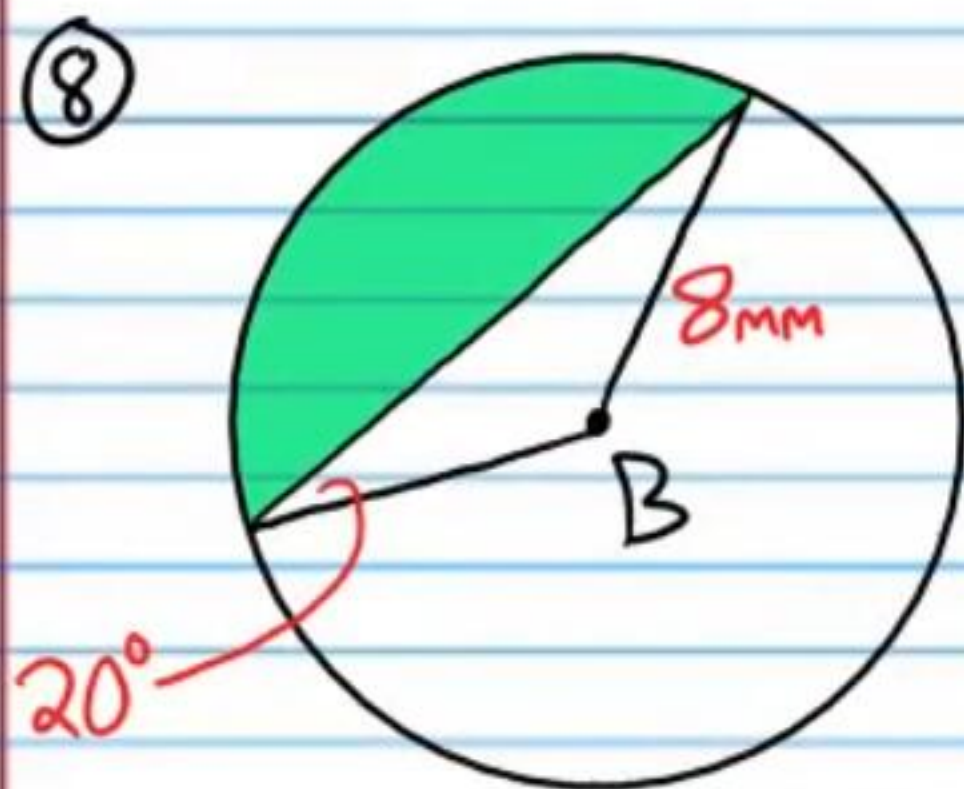

Find the area of each segment below. Round to the nearest hundredth. Keep four numbers to the right of the decimal in intermediate steps to avoid round off error. B is the center of each circle.

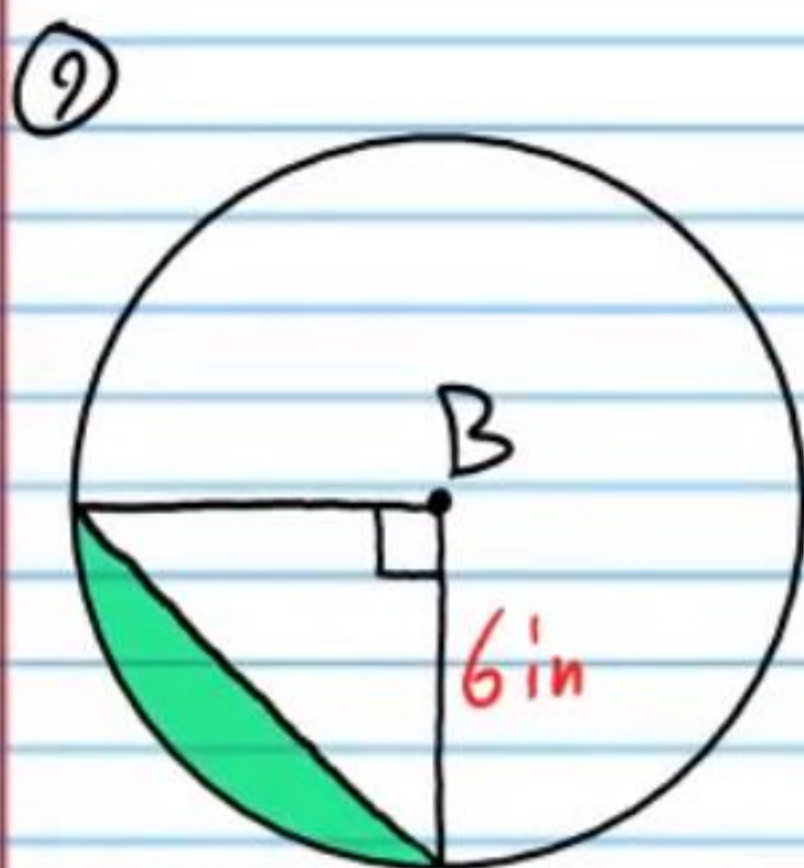

3.29 m²

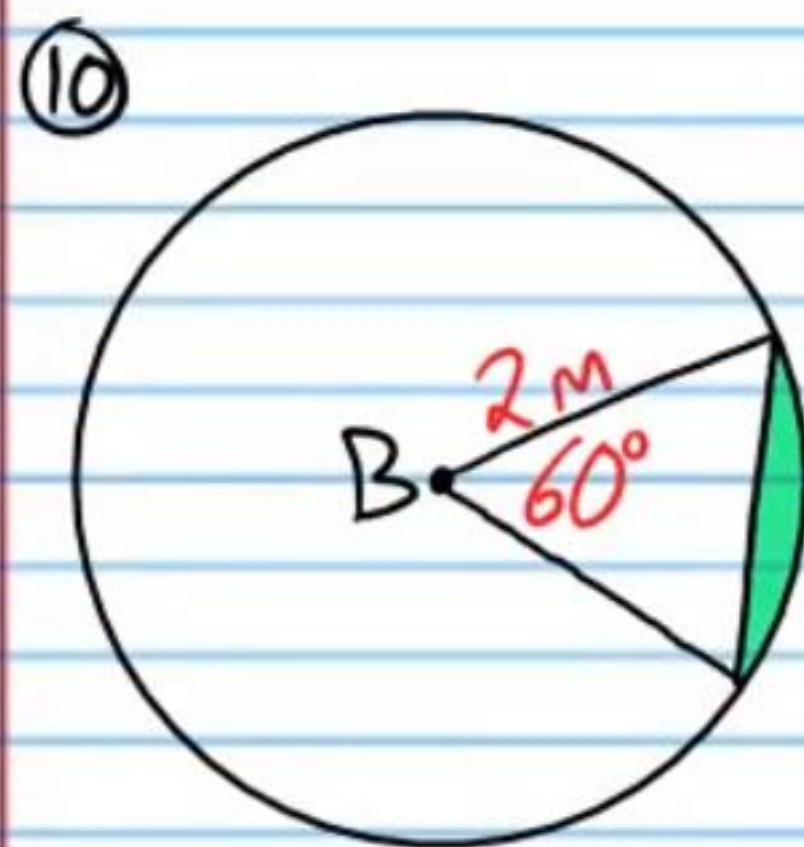

3.85 ft²

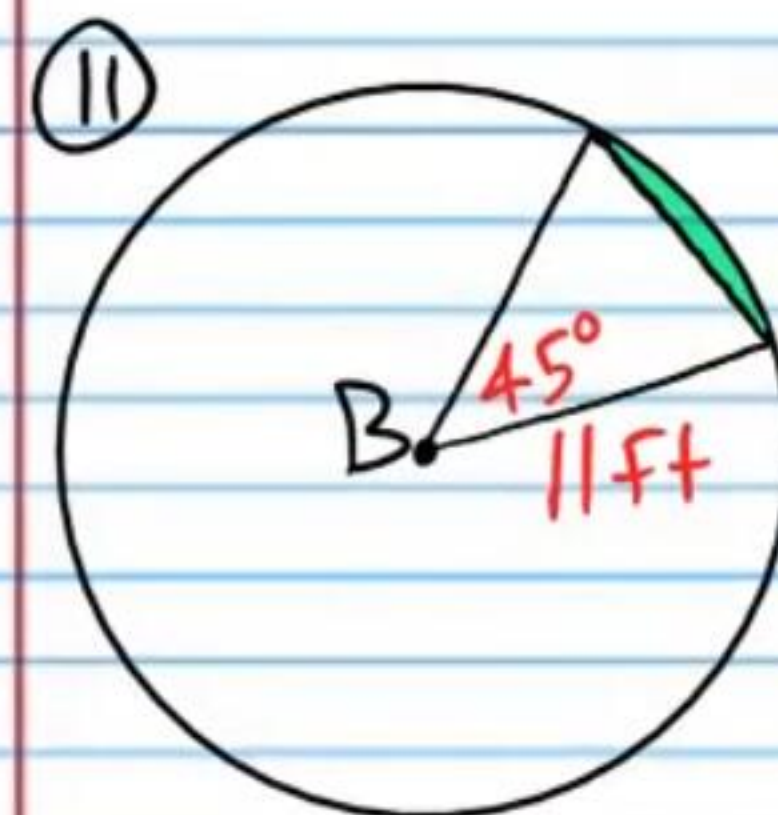

$$57.62\text{ mm}^2$$

$$10.27\text{ in}^2$$

$$0.36\text{ m}^2$$

$$4.74\text{ ft}^2$$
