

Graphing Quadratic Expressions (Homework)

Graph the following quadratic expressions. Label axes and all coordinates.

① $y = 3x^2 + 24x + 50$

② $-x^2 + 2x + 1 = y$

③ $y = 2x^2 + 8x + 5$

④ $-4x^2 + 24x - 37 = y$

⑤ $y = x^2 - 10x + 28$

⑥ $y = 3(x+2)(x-2)$

⑦ $(x-3)(x-5) = y$

⑧ $-(x+2)(x-6) = y$

⑨ $y = 2(x+5)(x-1)$

⑩ $y = -2(x+2)(x+3)$

⑪ $y = 6(x+5)^2 + 4$

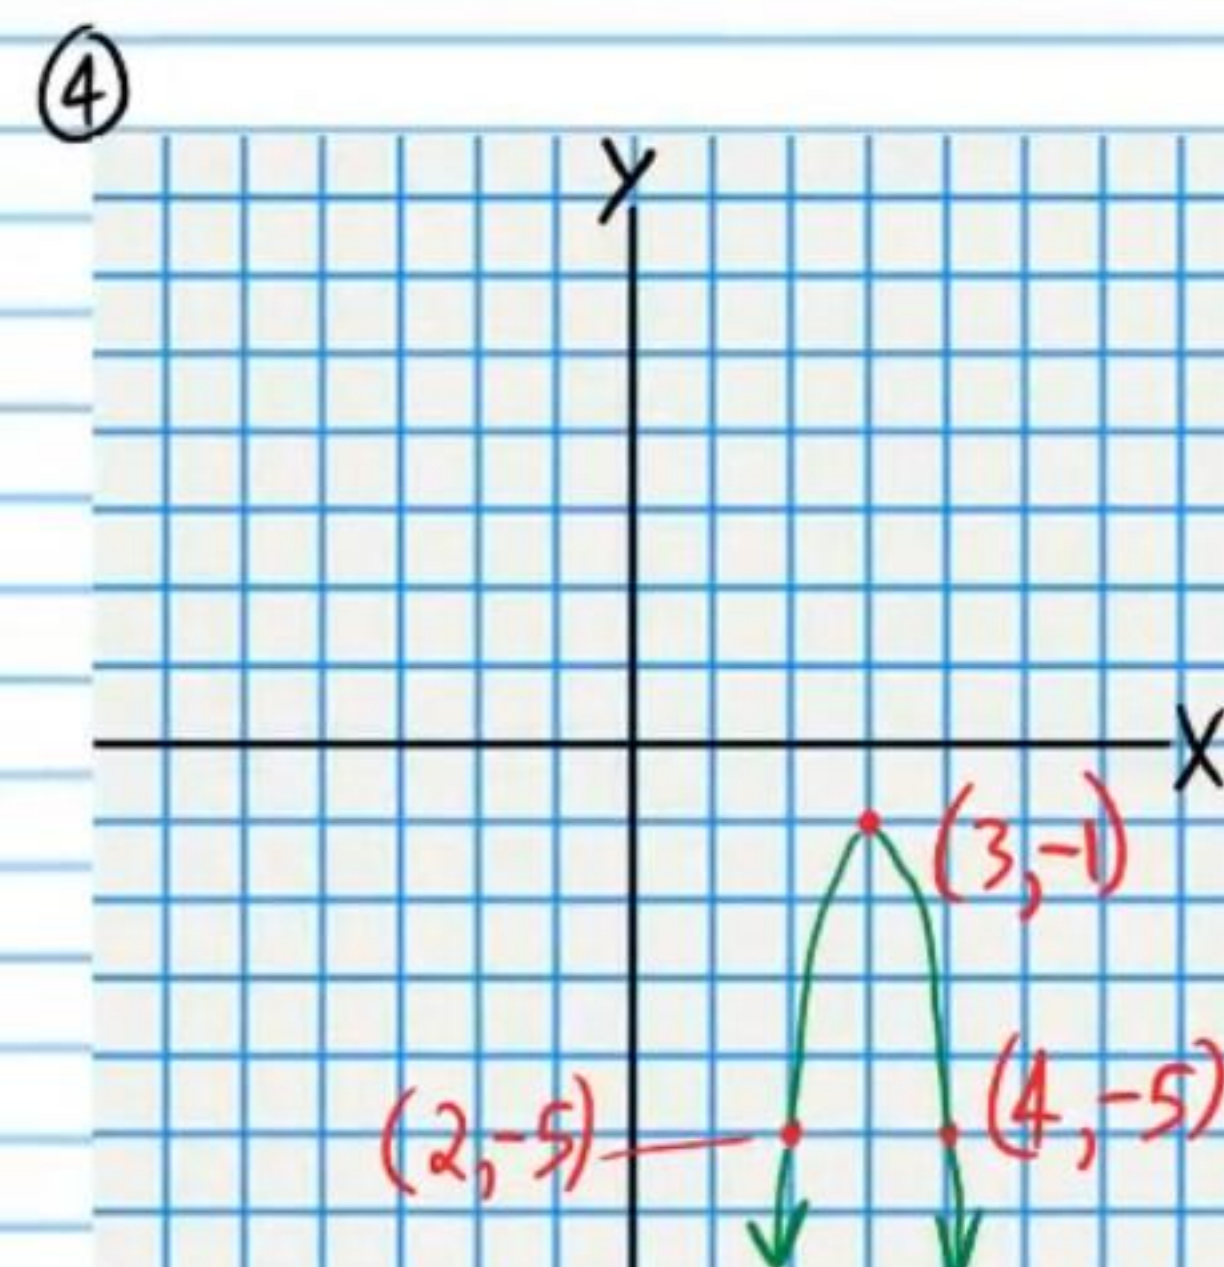

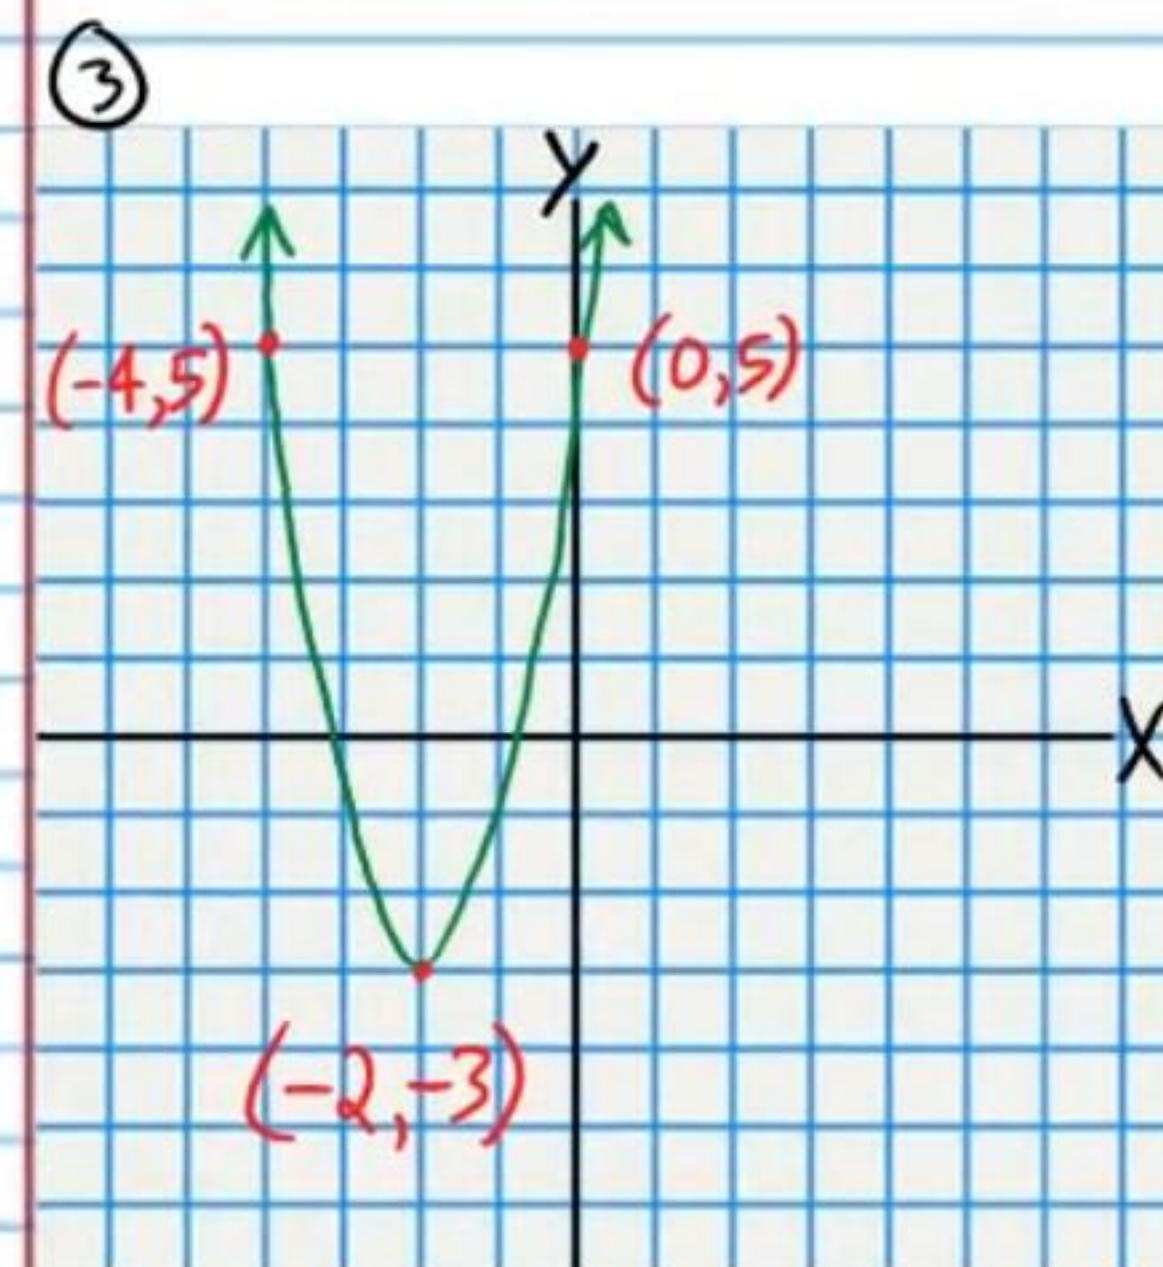

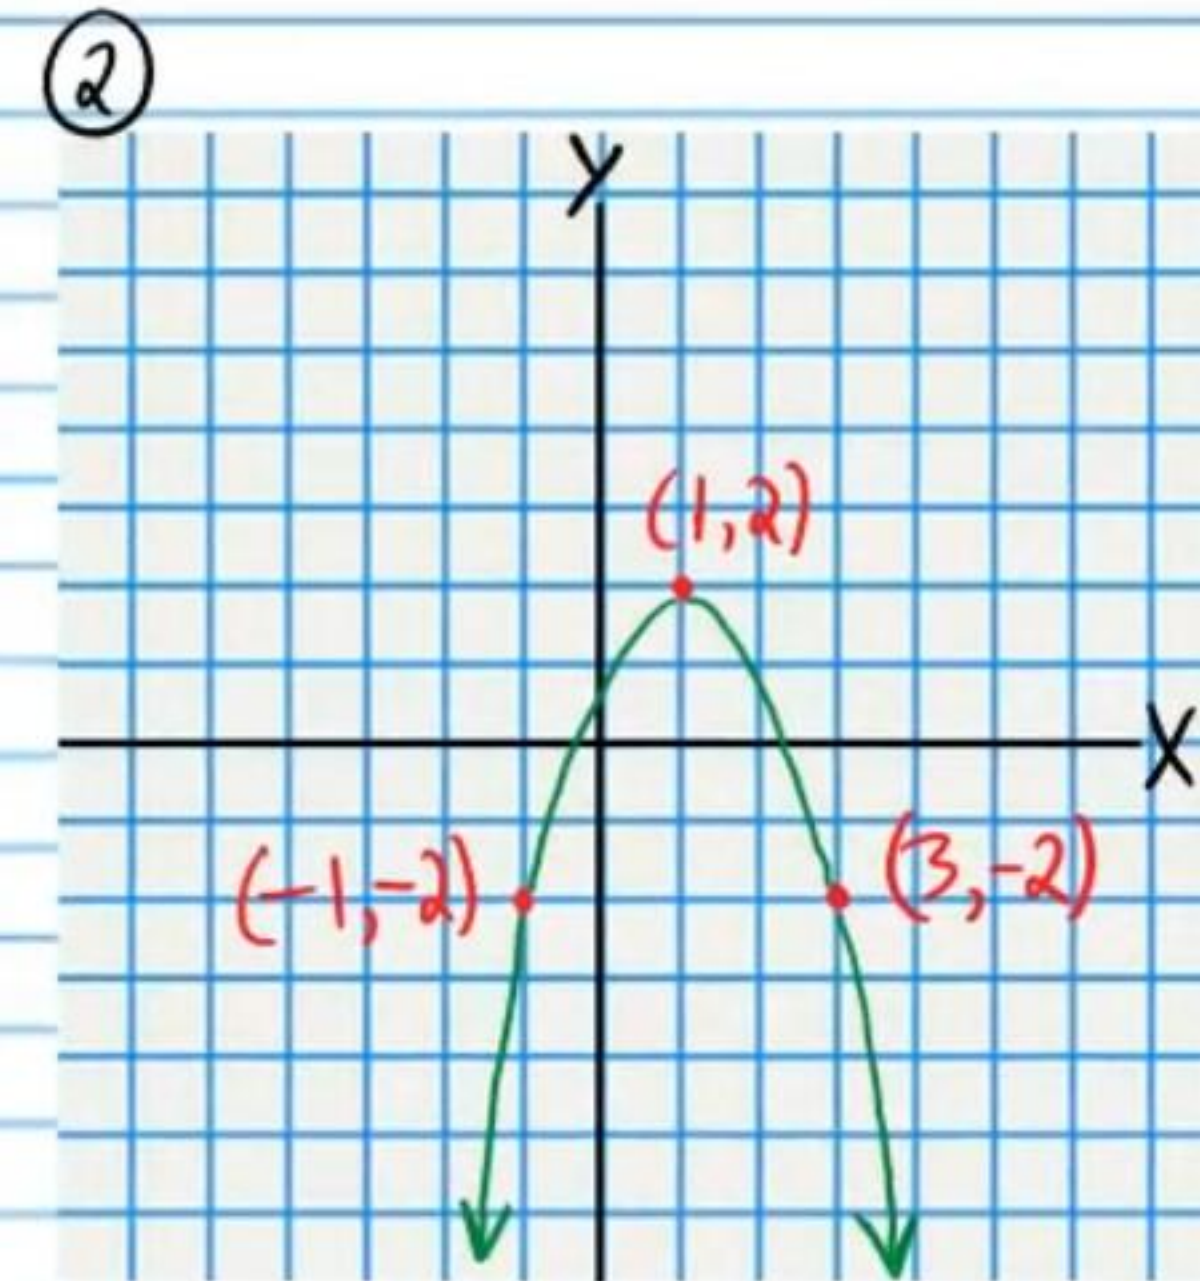

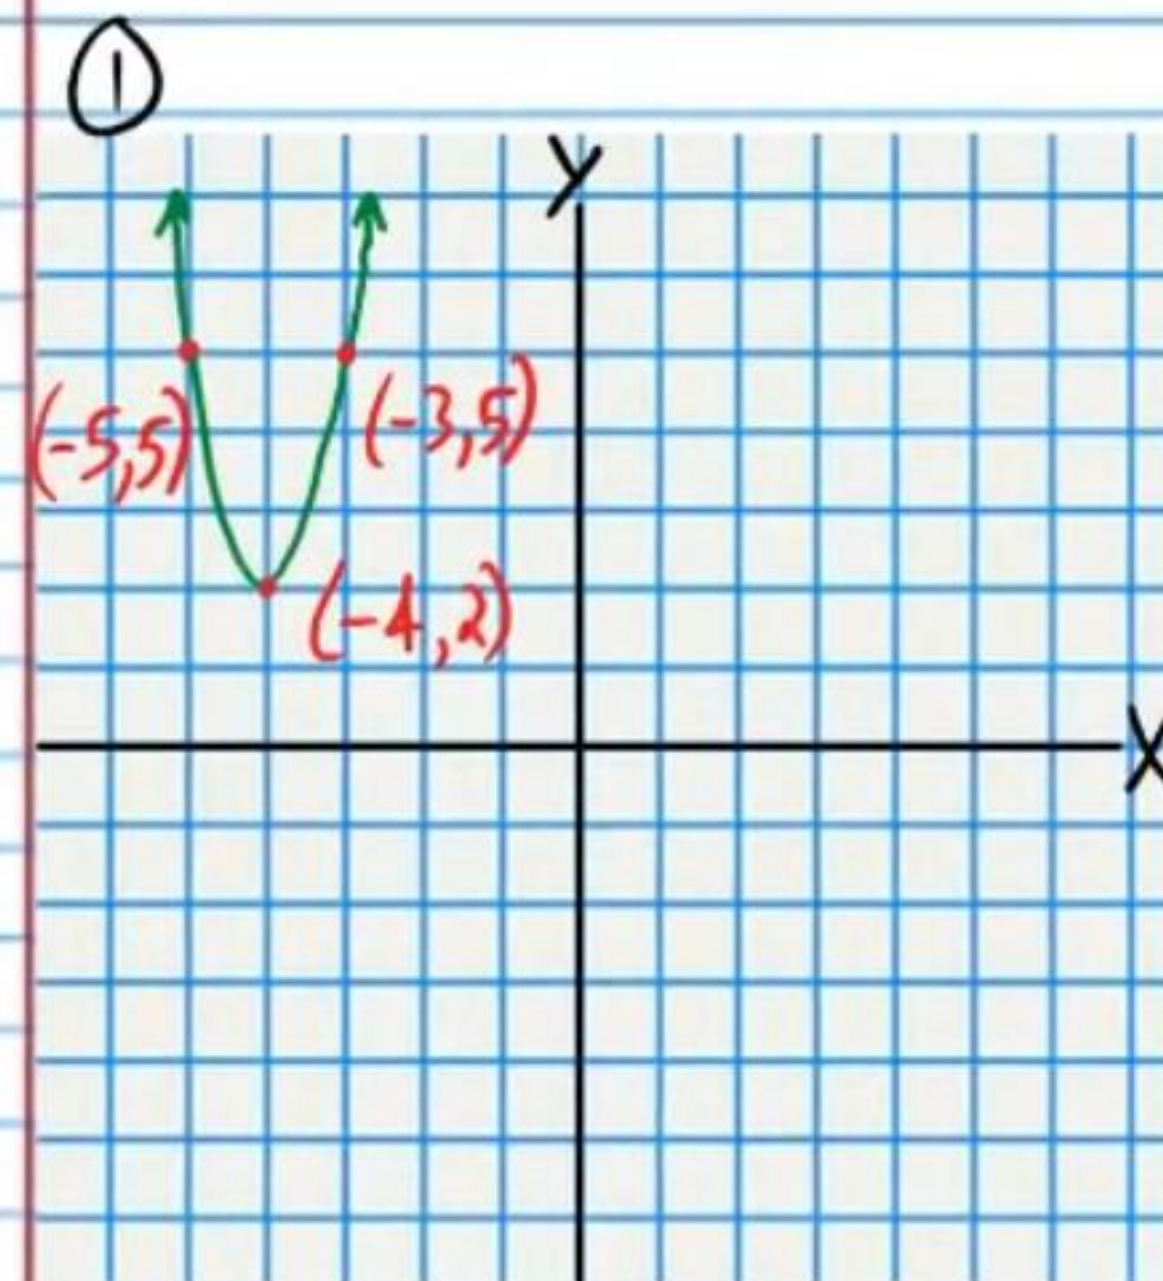

⑫ $(x-2)^2 + 3 = y$

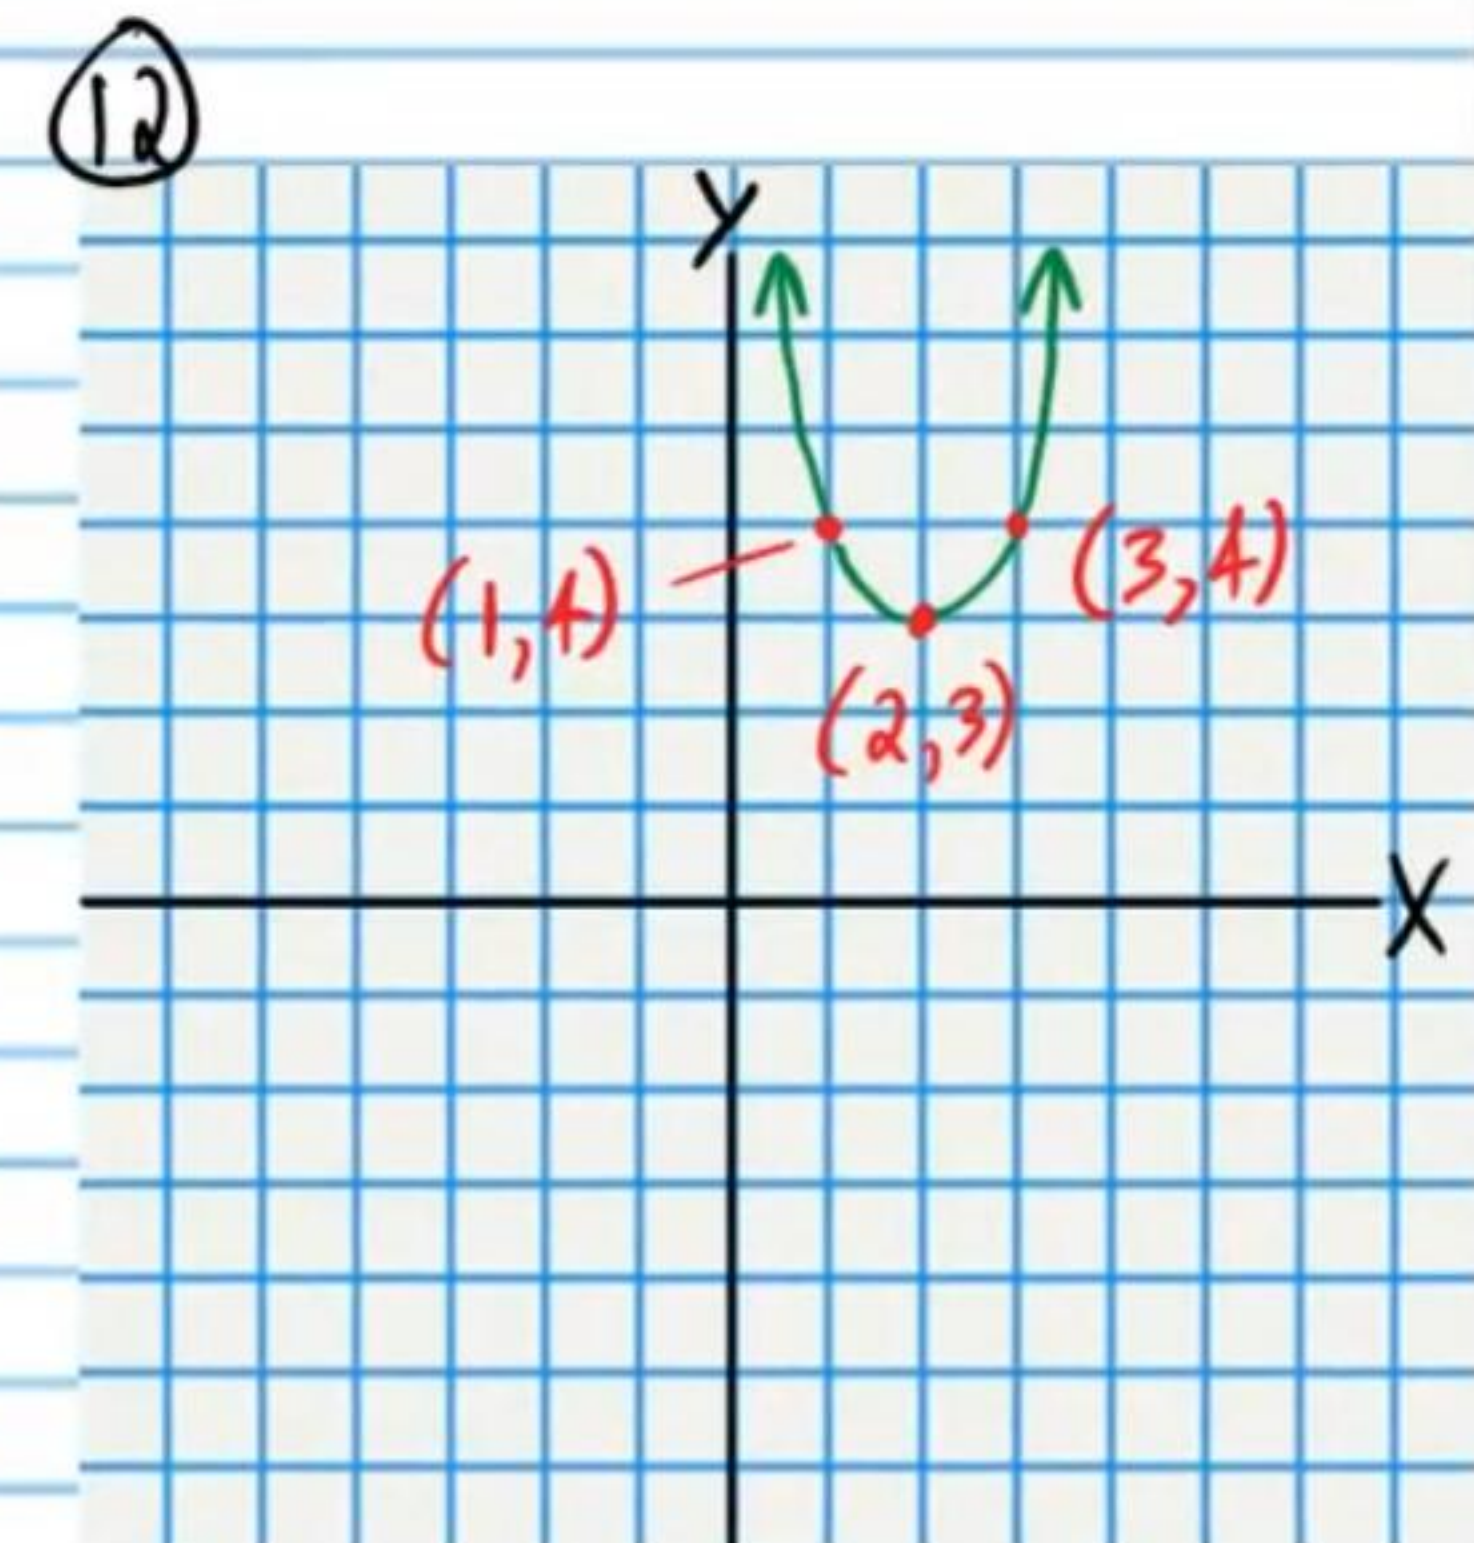

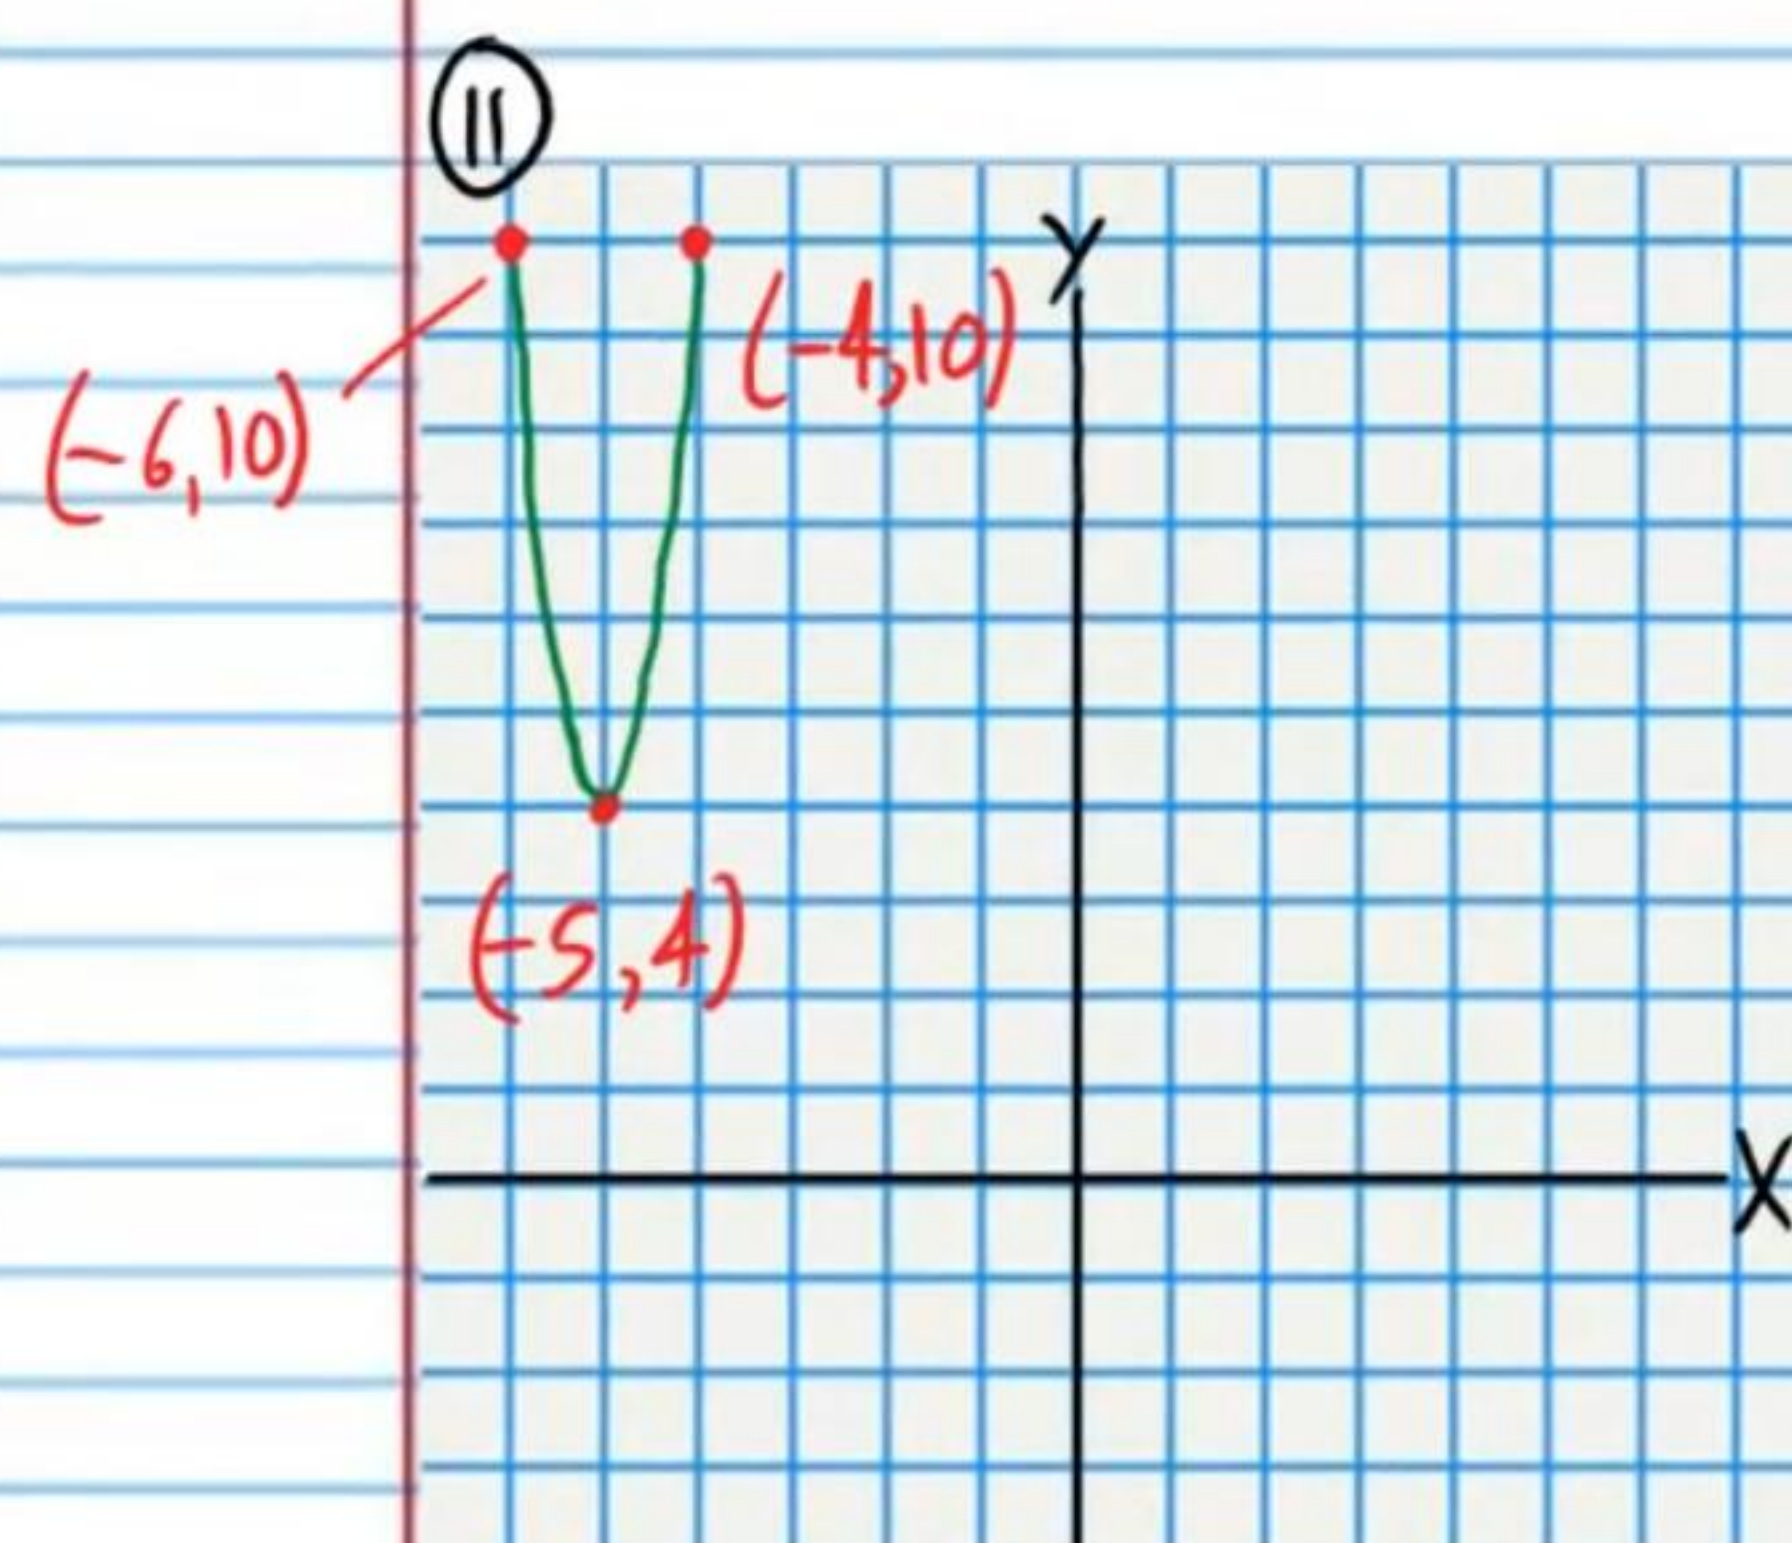

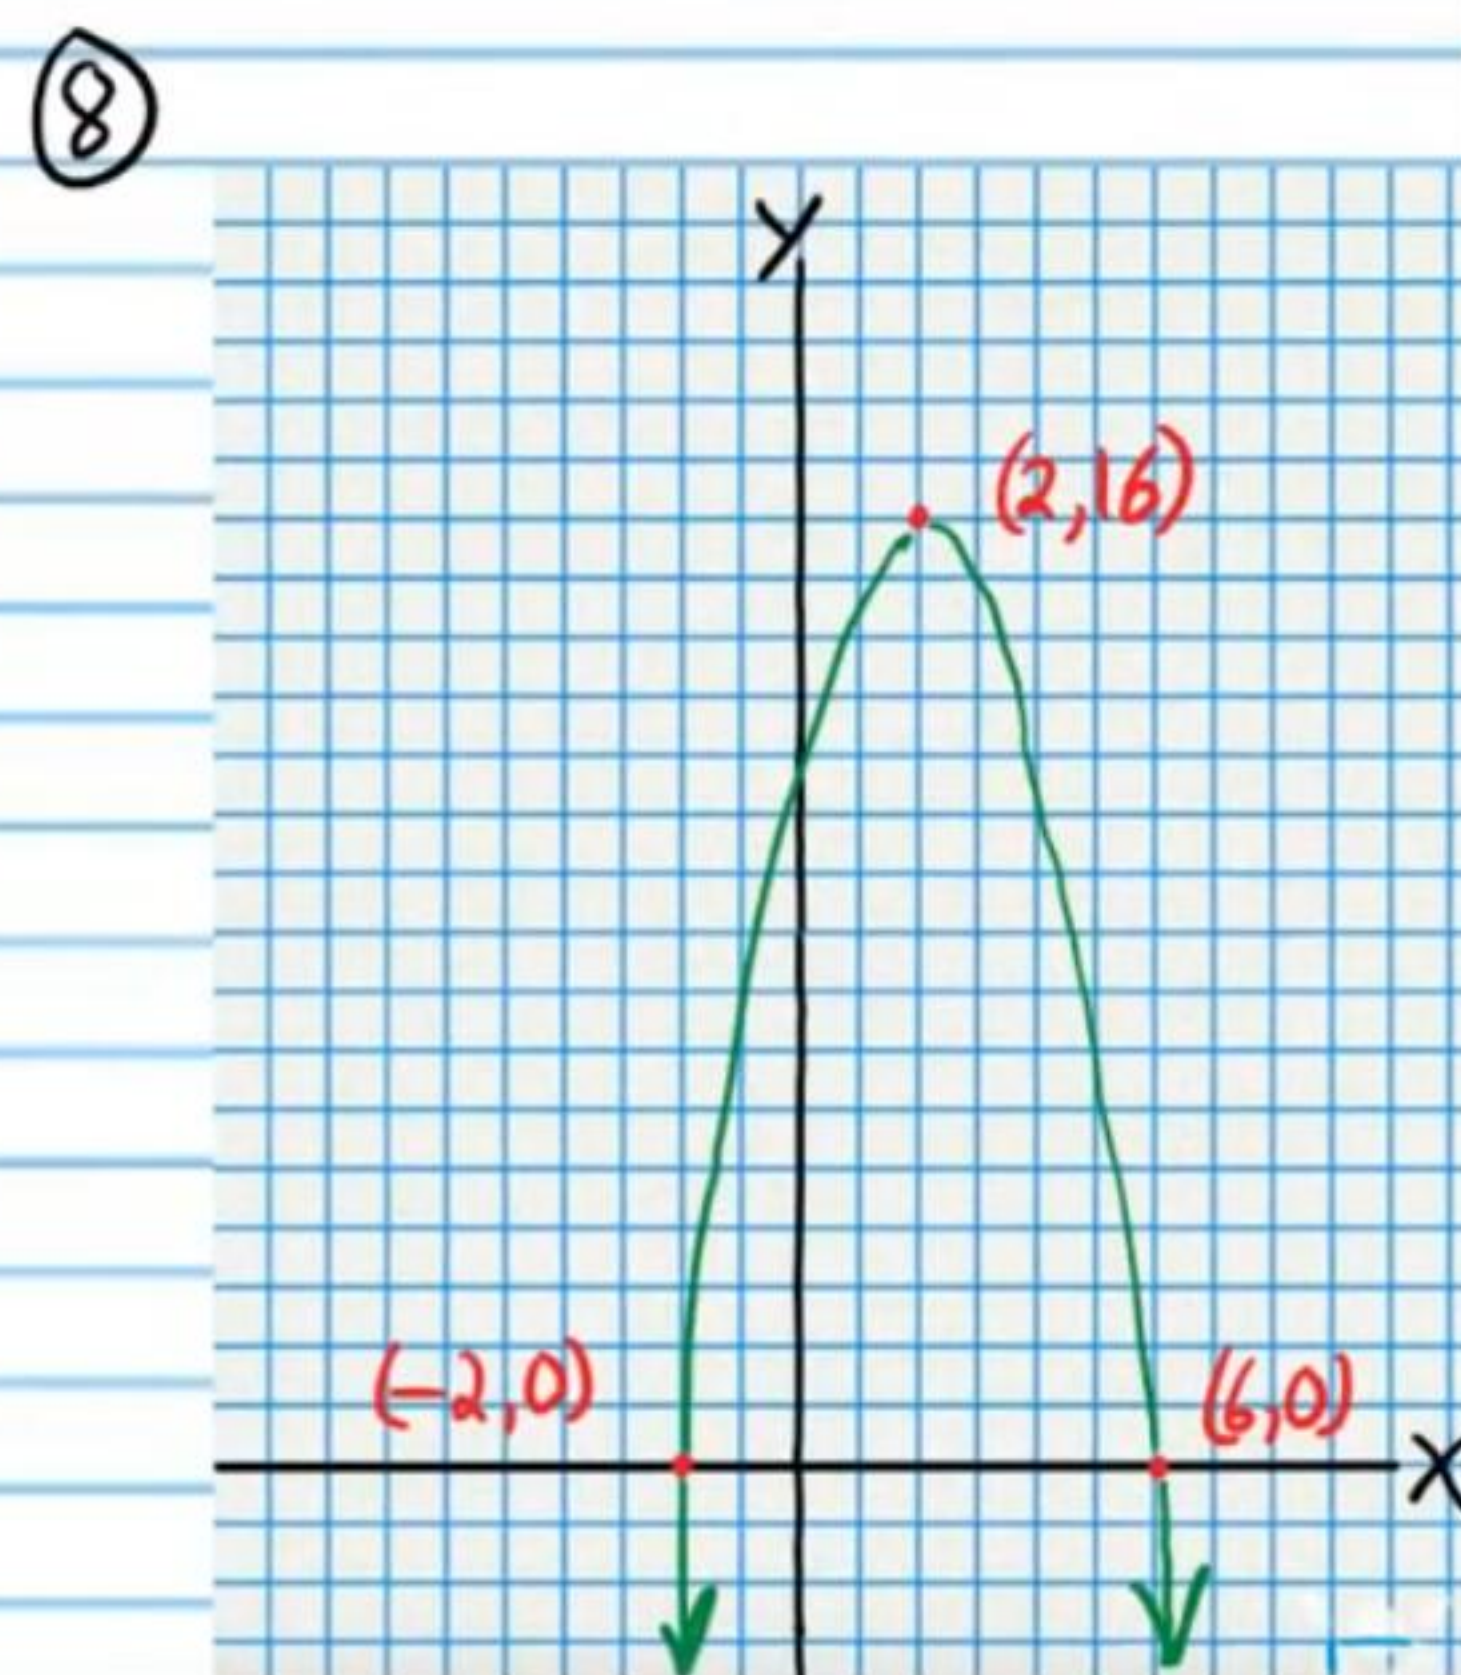

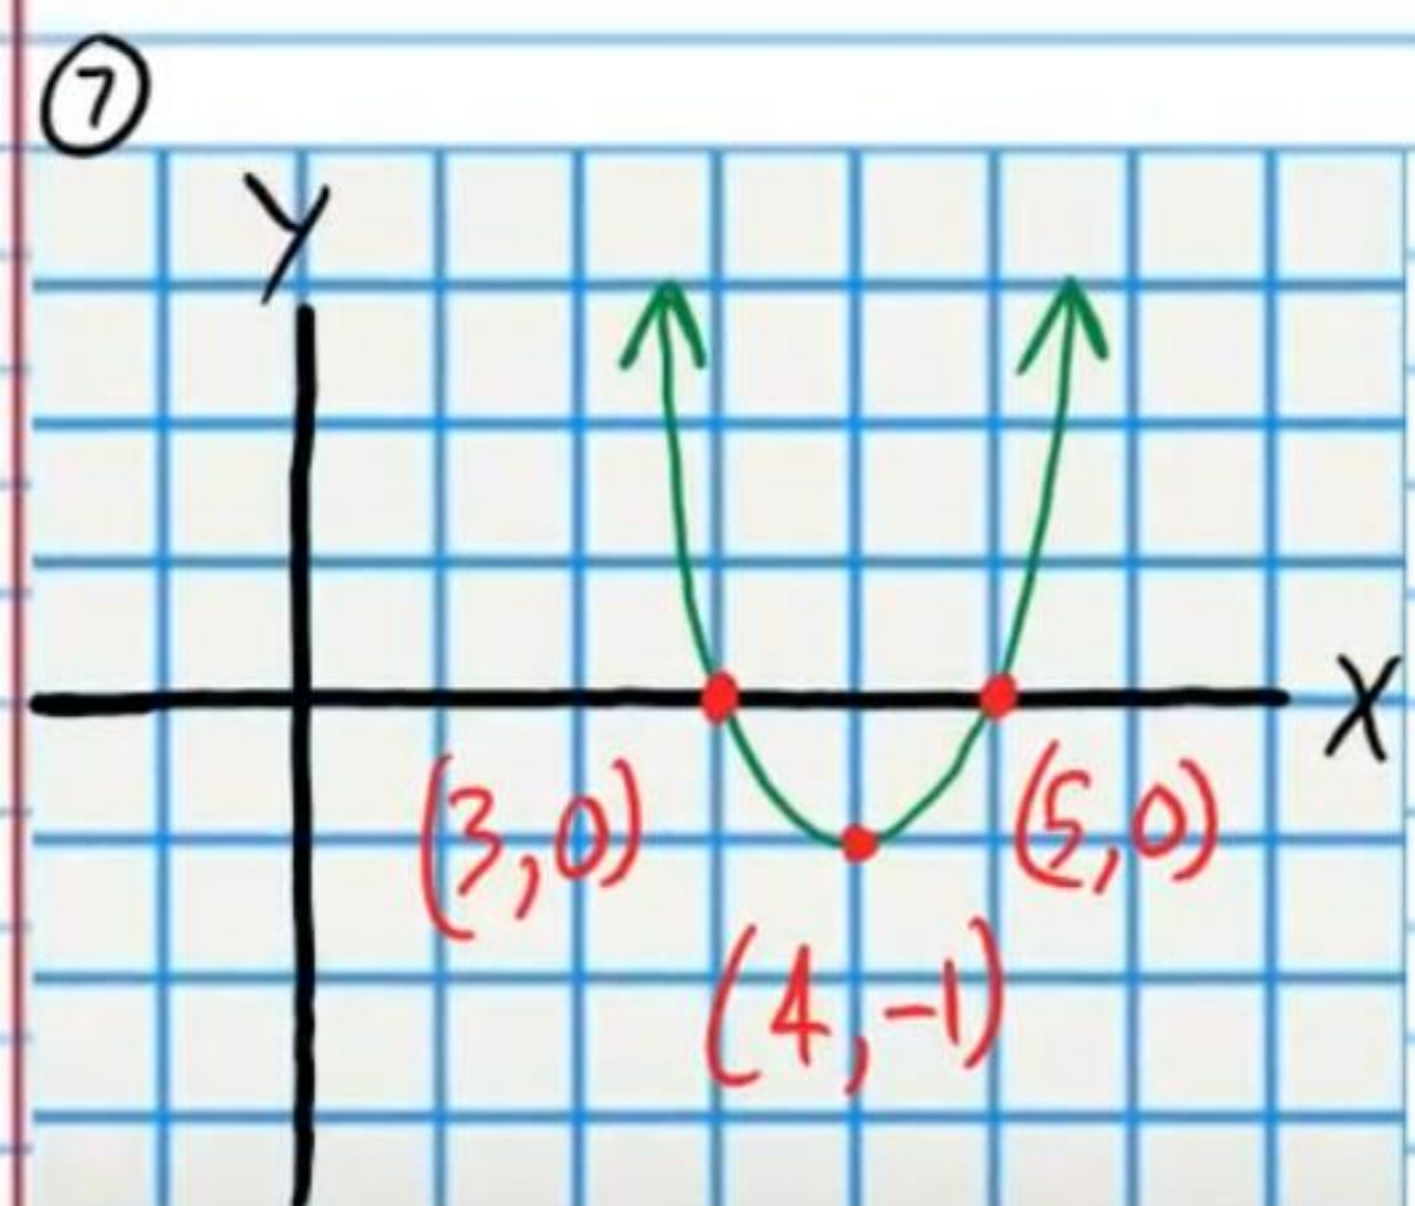

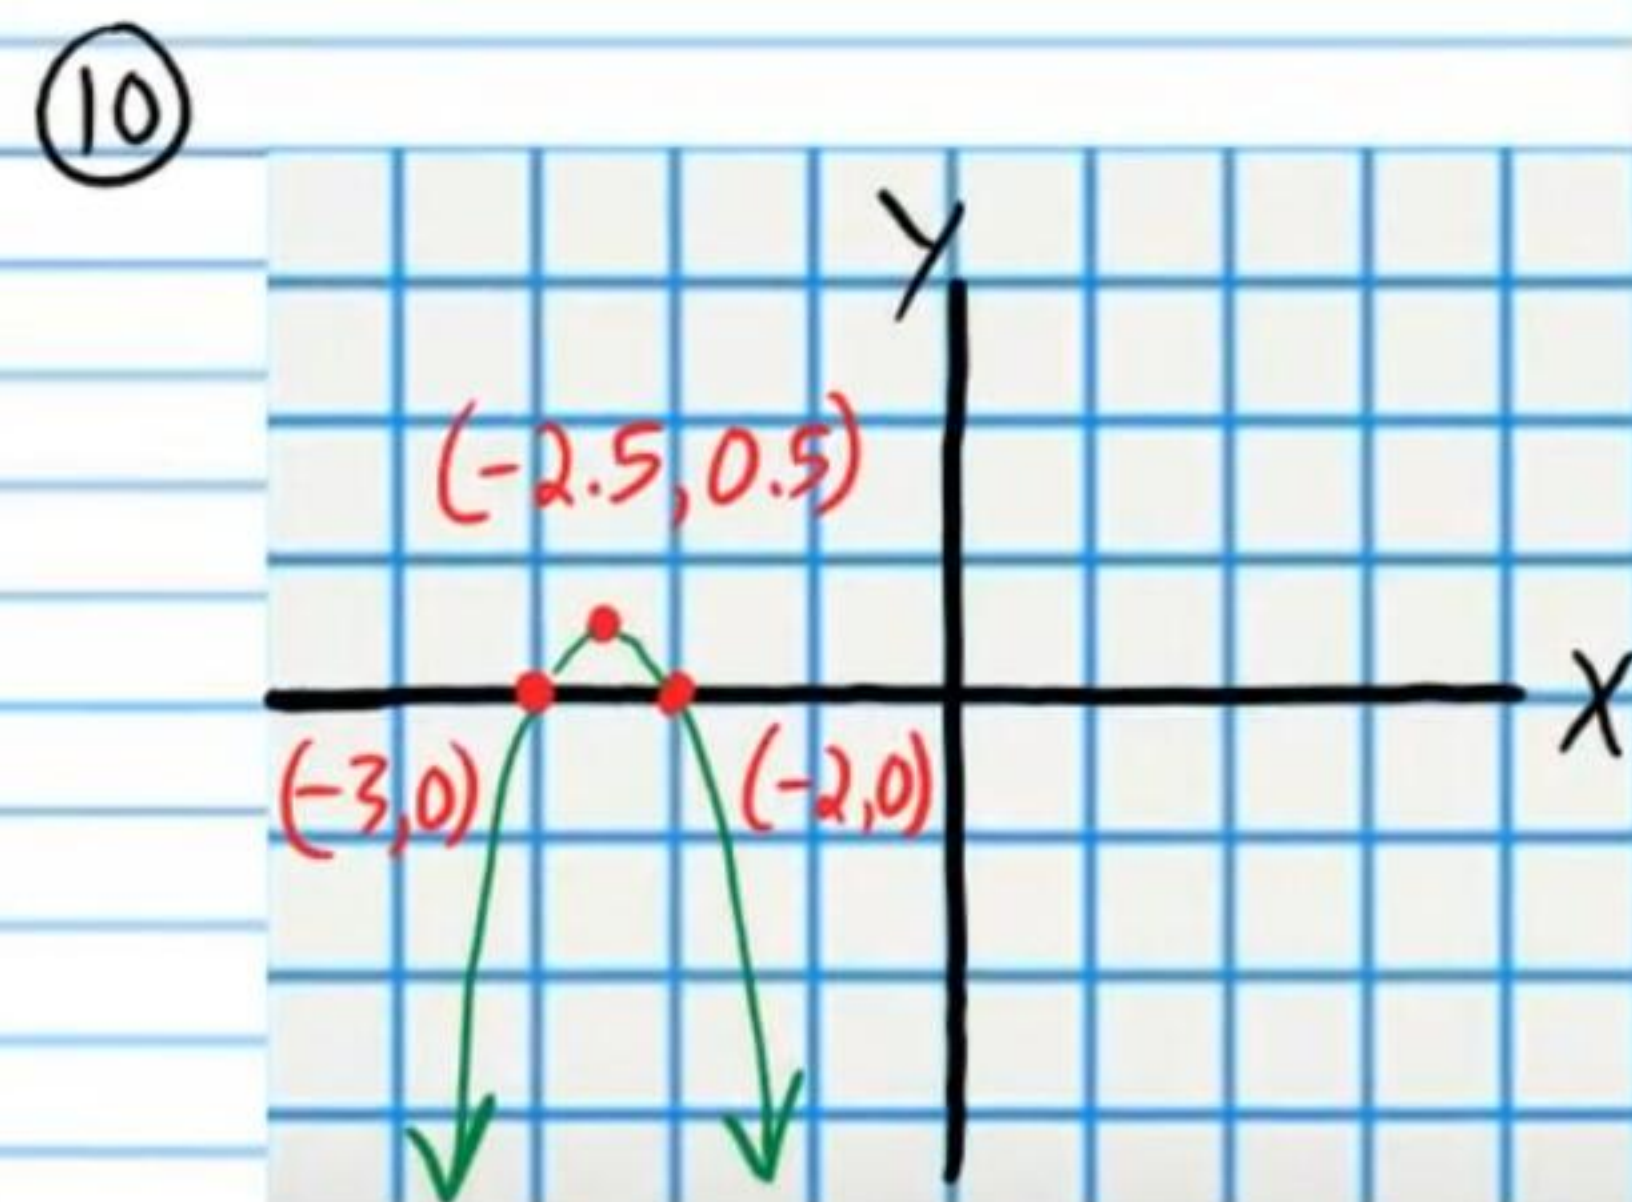

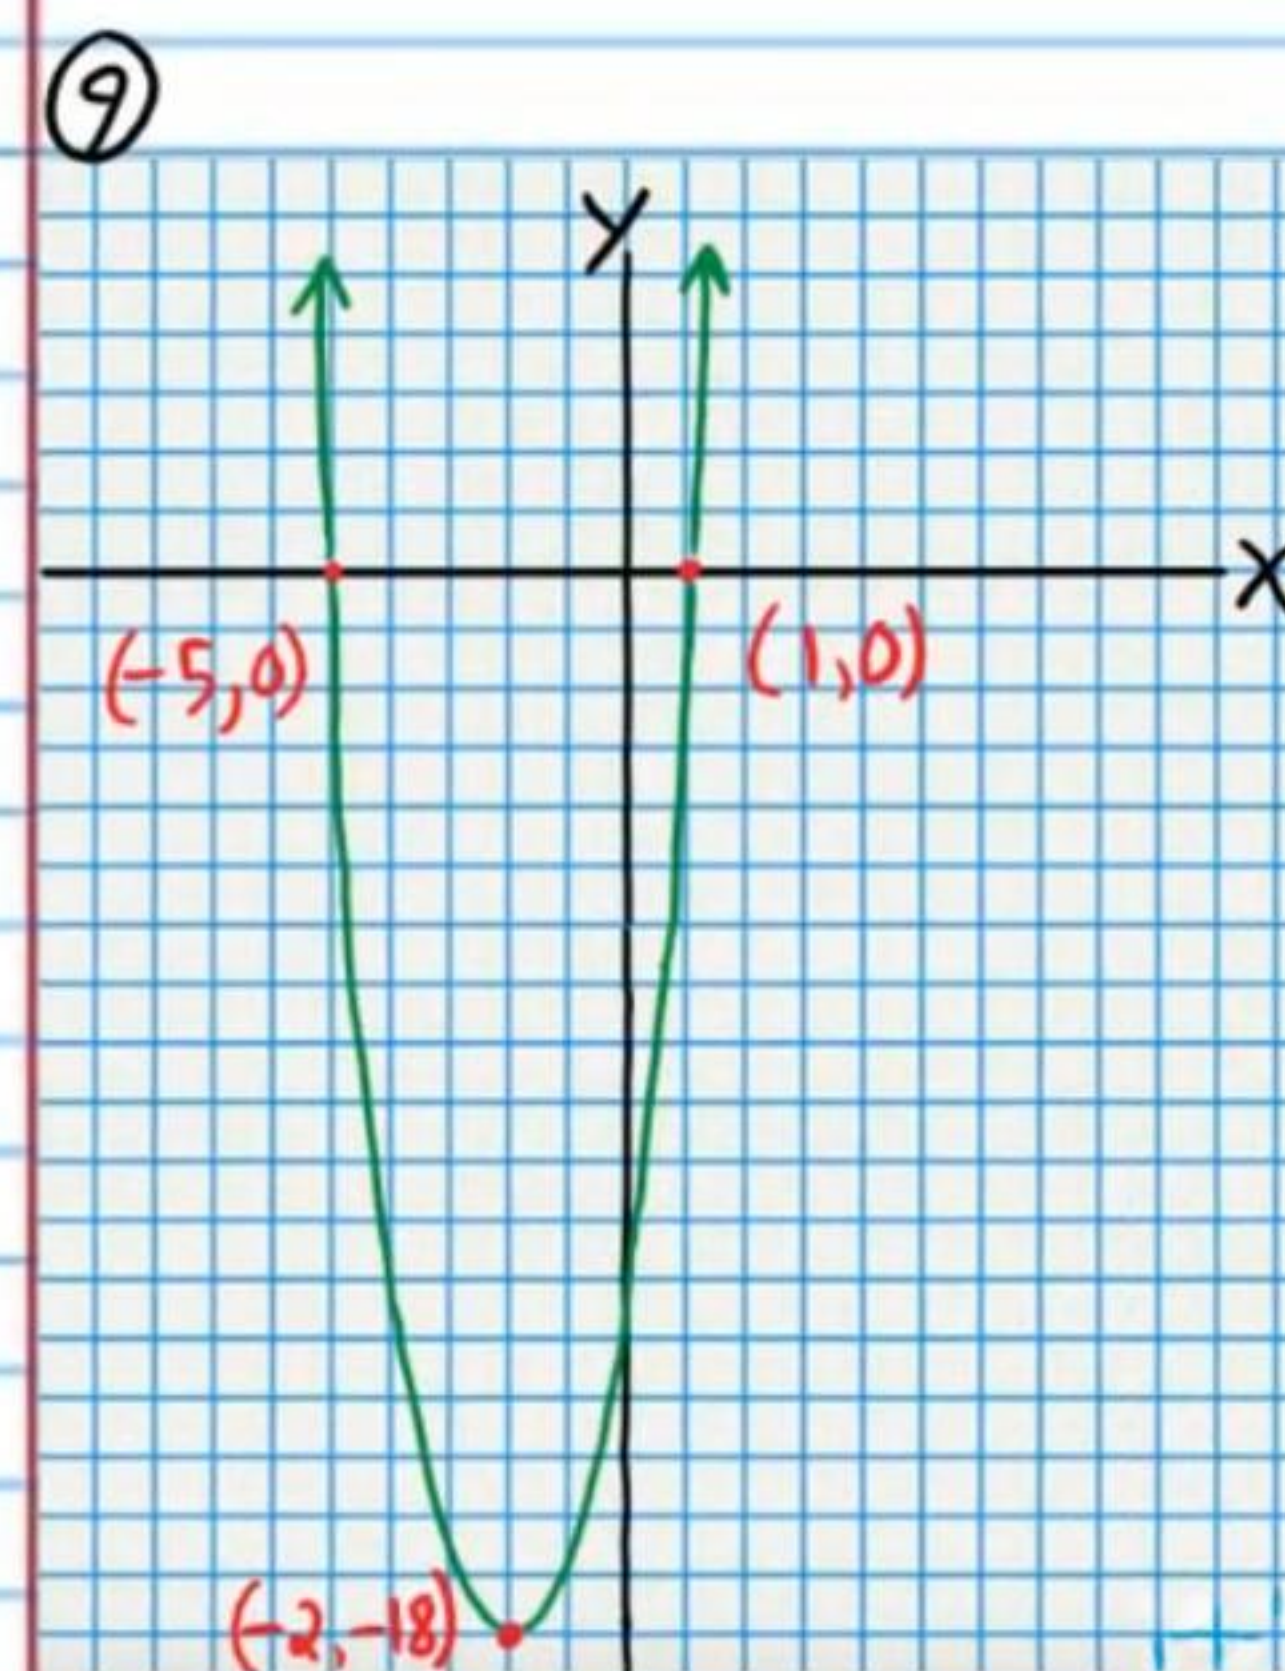

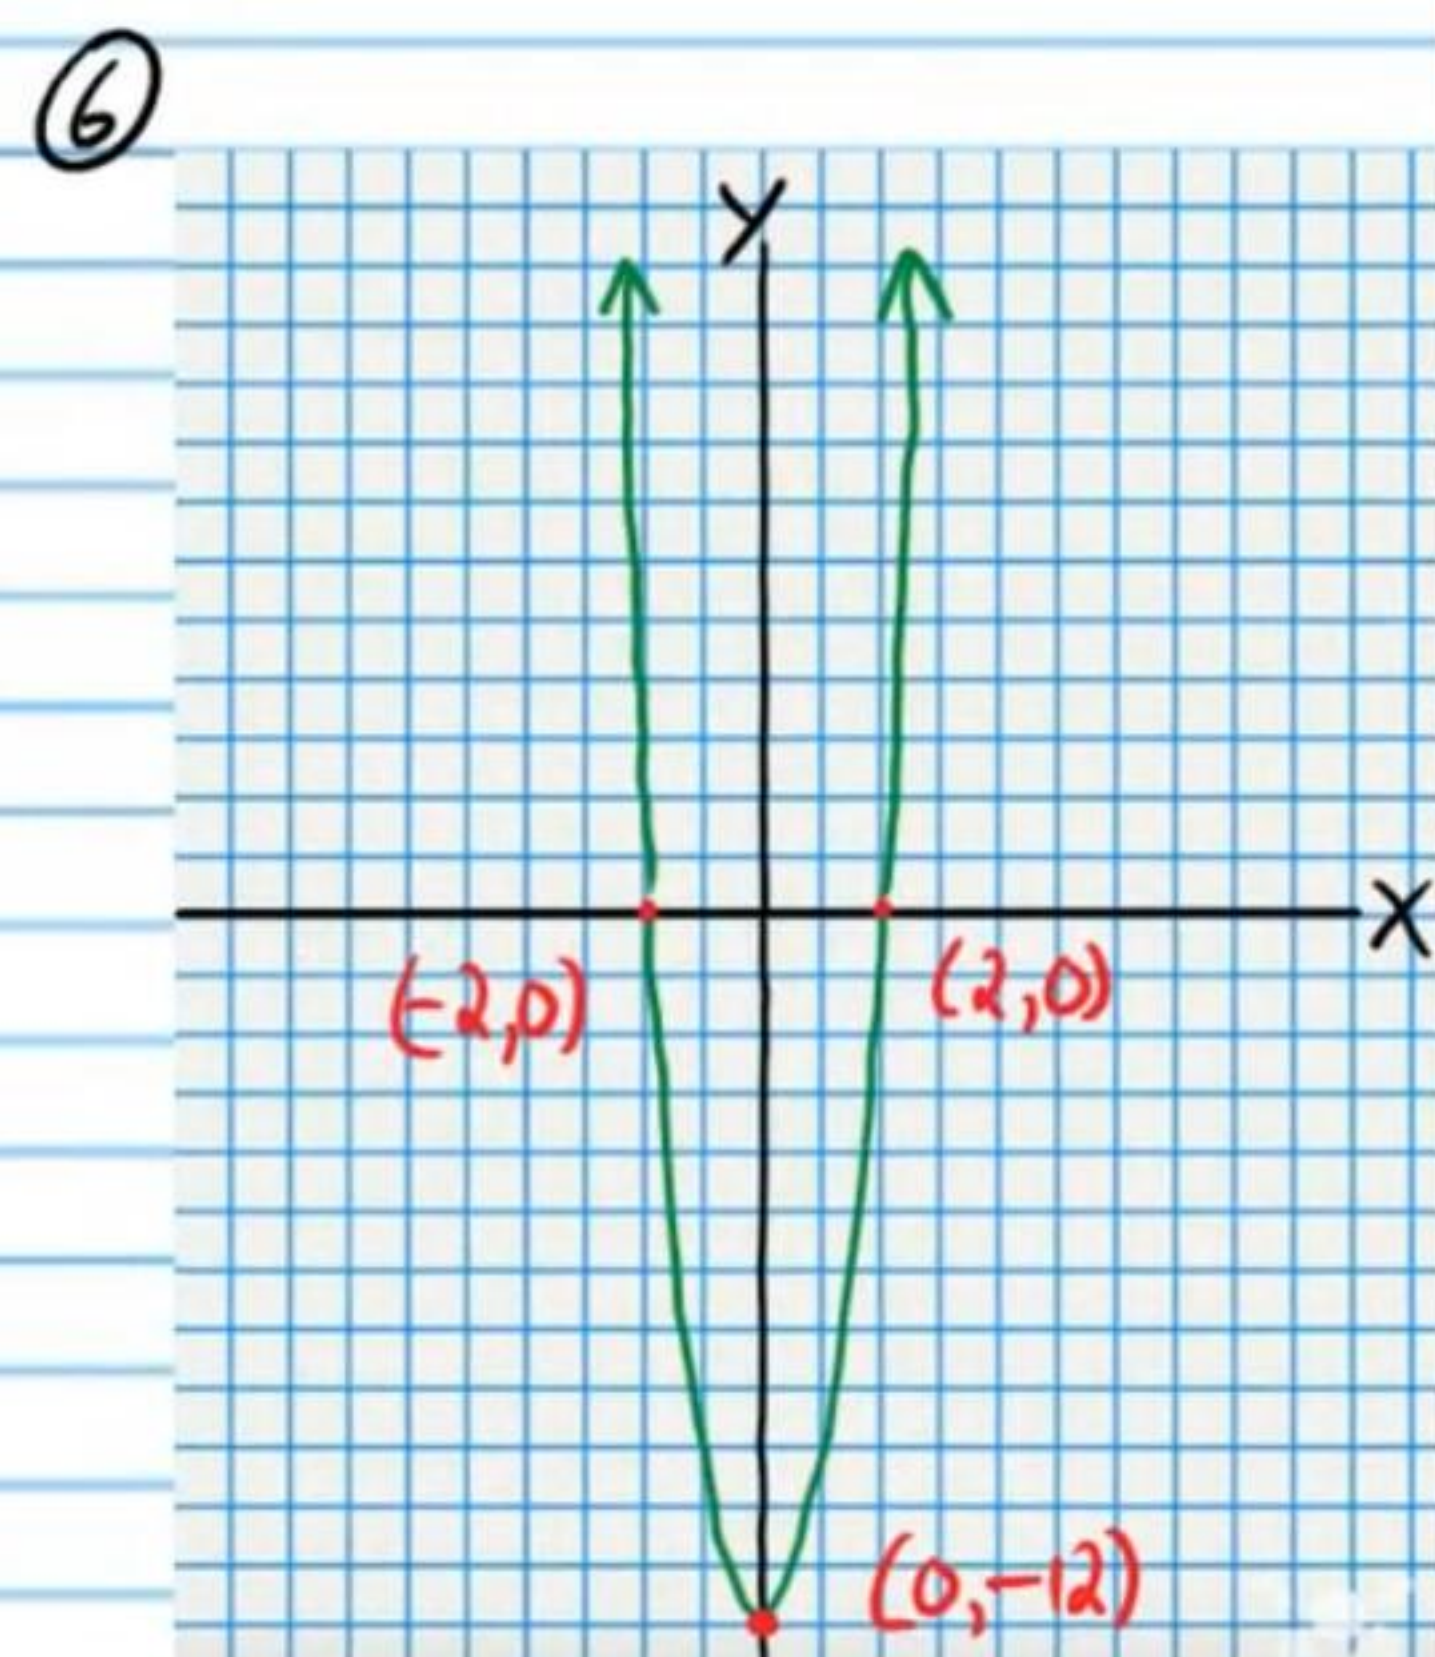

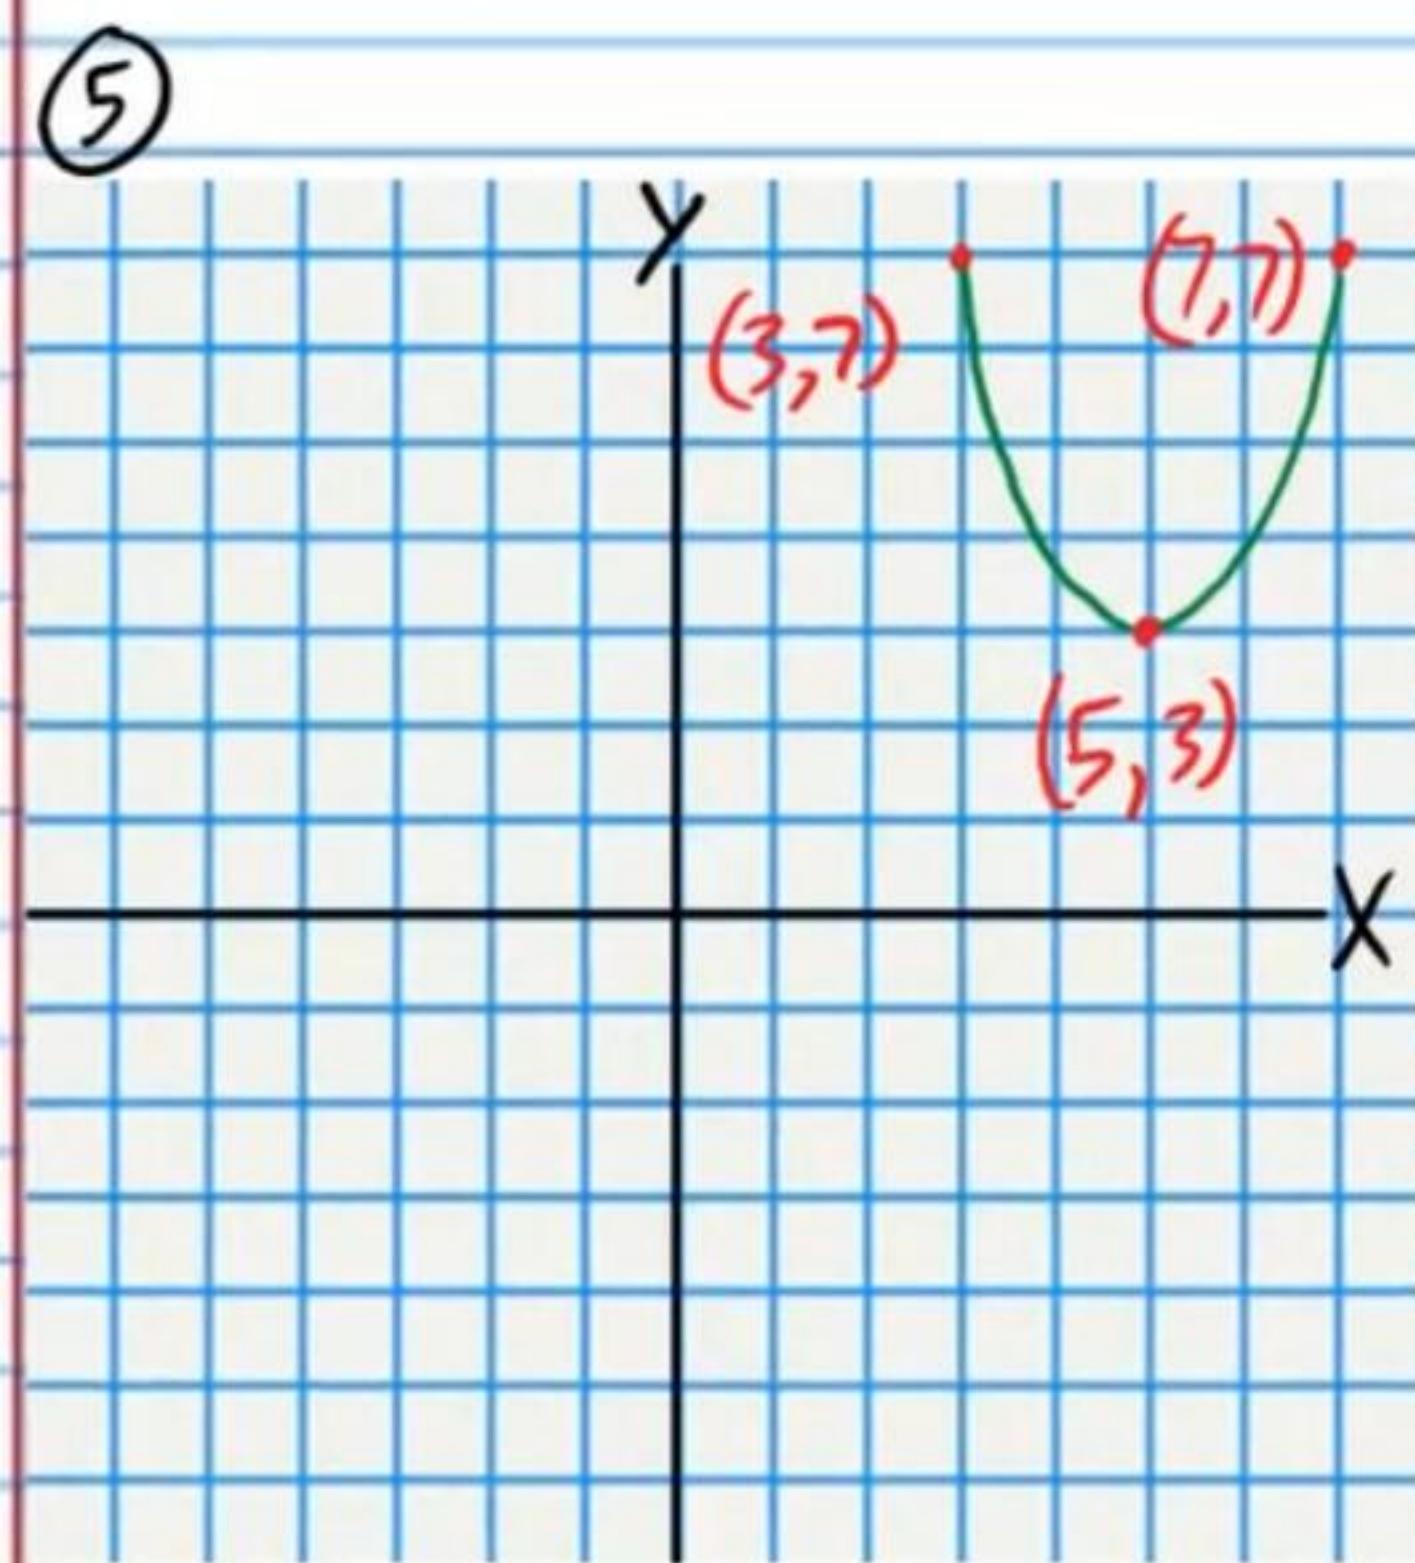

⑬ $y = 4(x+3)^2 - 4$

⑭ $-(x-1)^2 + 3 = y$

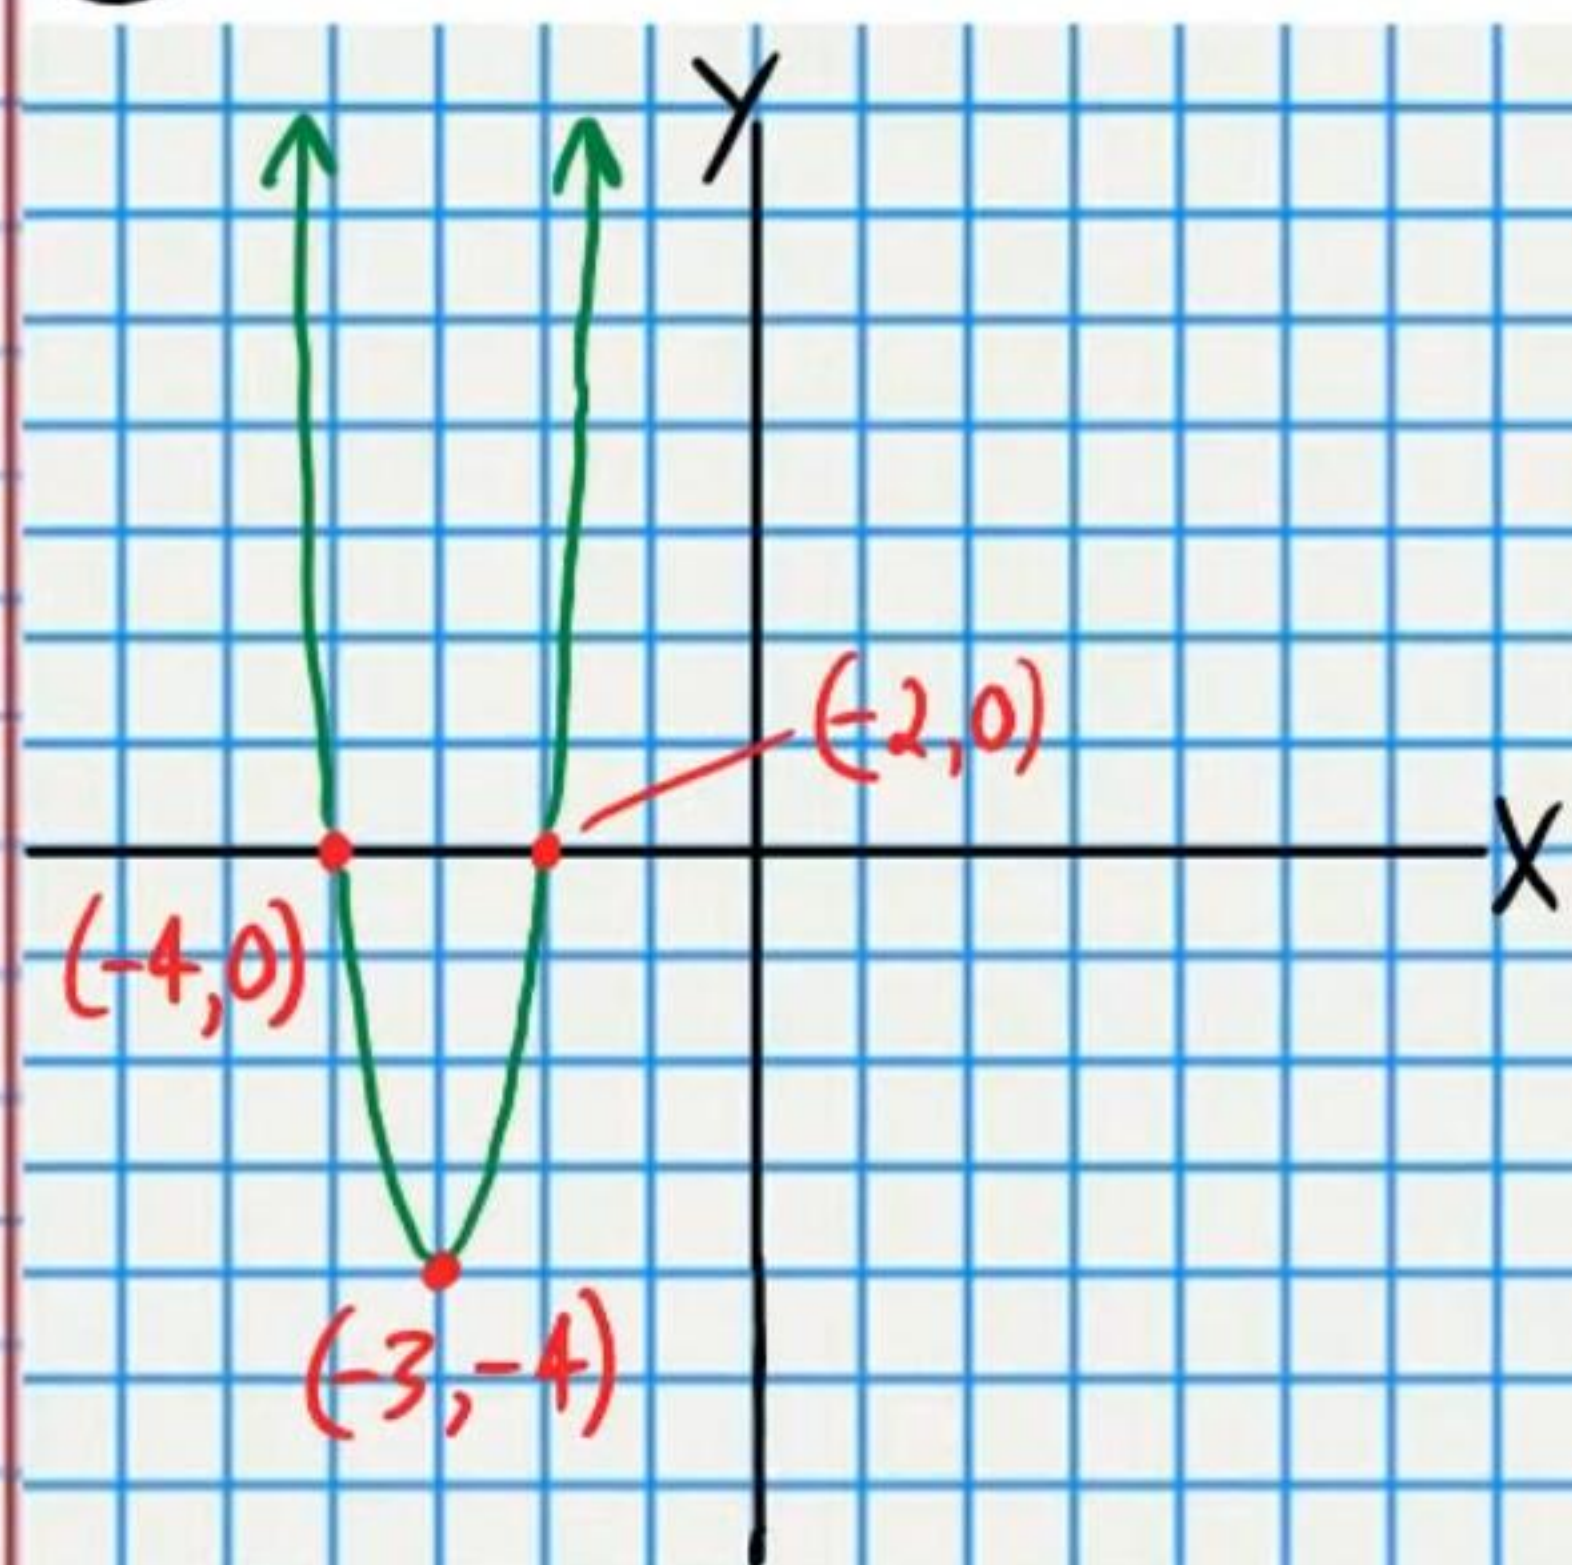

⑮ $y = 3(x+2)^2 + 1$
