

The Law of Sines (Homework)

Find the missing side lengths and angle measures of each triangle. In other words, solve each triangle.

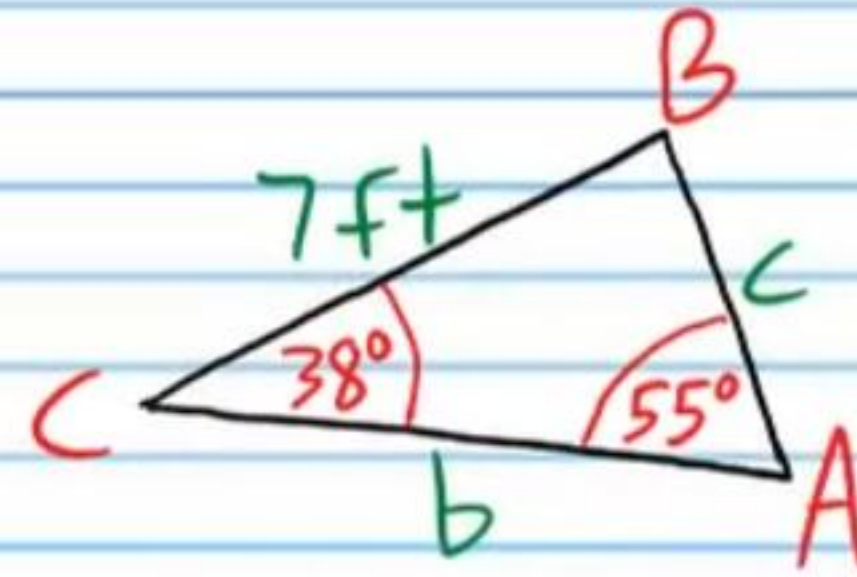

① I) Find $m\angle A$.

II) Find b .

III) Find a .

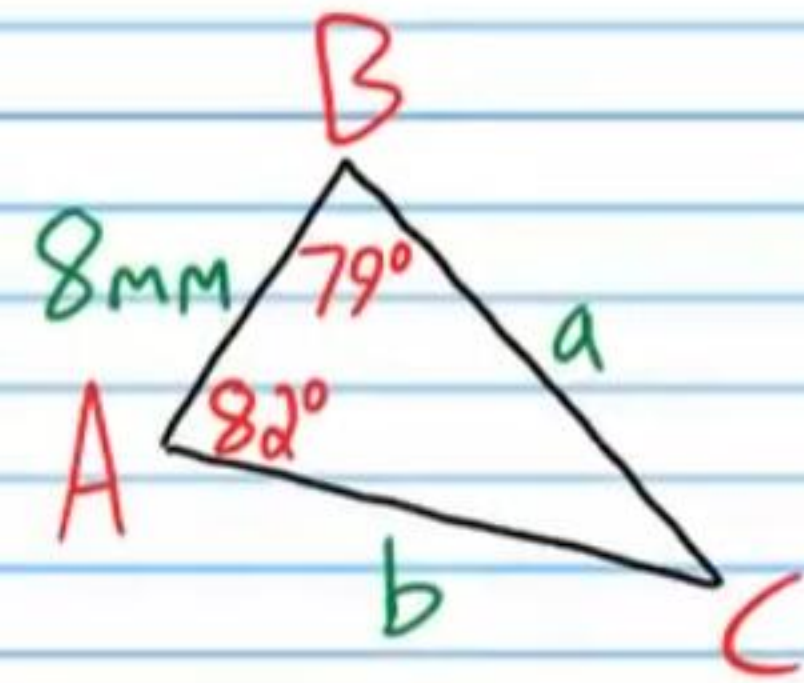

② I) Find $m\angle B$.

II) Find c .

III) Find b .

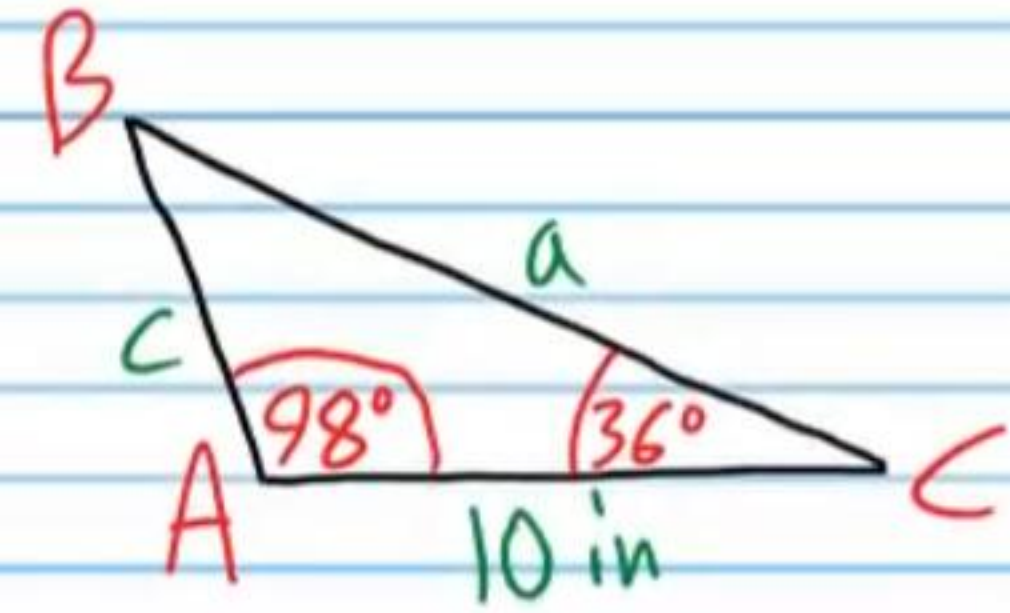

③ I) Find $m\angle C$.

II) Find a .

III) Find b .

④ I) Find $m\angle B$.

II) Find a .

III) Find c .

Homework Answers

① I) $m\angle A = 44^\circ$

II) $b = 10.24 \text{ cm}$

III) $a = 10.43 \text{ cm}$

② I) $m\angle B = 87^\circ$

II) $c = 5.26 \text{ ft}$

III) $b = 8.53 \text{ ft}$

③ I) $m\angle C = 19^\circ$

II) $a = 24.33 \text{ mm}$

III) $b = 24.12 \text{ mm}$

④ I) $m\angle B = 46^\circ$

II) $a = 13.77 \text{ in}$

III) $c = 8.17 \text{ in}$
